

General Guidelines on Tree Pruning:

Tree pruning is the removal of unwanted branches from a tree such as those shown on Fig. 11a either for reducing risk and inconvenience to the public, maintaining or improving tree health and structure, or improving appearance of trees. Improper tree pruning is detrimental to the appearance and healthy growth of trees and may result in irreparable damage to trees. These general guidelines provide basic information on tree pruning and issues requiring particular attention during execution of works. Tree pruning should be carried out by trained personnel and under proper supervision by experienced persons with expertise in horticulture, arboriculture and tree care.

 - (iii) protecting pedestrians and properties from damage by dead, hanging and detached twigs/branches falling from the tree. Twigs/branches with potential to fall should be removed once detected.
 - (iv) maintaining good lighting condition by removing the branches of trees blocking street lamps.
- (b) **Maintaining or Improving Health and Structure of Trees**
