M.N. Hegde, 2022-10-31 A Coursebook on Aphasia and Other Neurogenic Language Disorders Fifth Edition is a textbook for courses in aphasia and other neurogenic communication disorders. It is organized in a unique and interactive coursebook format that divides pages into columns with written information next to columns with space for note taking. This allows instructors to make lecture notes and students to write class notes on the right half of each page of the text. The Coursebook offers a comprehensive description and critical review of basic and applied research on aphasia, right hemisphere disorder, RHD, traumatic brain injury, TBI, and dementia, the four major language and communication disorders associated with neurological pathologies. The relationship between the brain and language, major features of aphasia and other disorders, their assessment and treatment have been described in streamlined and clinician friendly language. Critical review of theories, assessment and treatment research helps speech language pathologists distinguish valid from the questionable in the professional and scientific literature. All assessment and treatment chapters give an outline of comprehensive and practical procedures integrating current practices that clinicians might readily use. New to the Fifth Edition: Part I has been restructured under the heading Brain and Language to describe the neuroanatomical bases of language and language impairments associated with neuropathological variables. The chapter on neurodiagnostics has been updated to include a variety of surgical, radiological and imaging procedures that help students understand the relationship between the brain structure and function and their involvement in language production and comprehension. Part II has been reorganized into three chapters on aphasia. Chapter 3 offers a comprehensive review of aphasia prevalence, definition and classification. Newer perspectives on intraoperative cortical brain mapping and alternative classification of aphasia based on recent research on the dual stream hypotheses related to brain and language have been reviewed with critical evaluation to help clinicians. Chapters 4 and 5 on assessment and treatment of aphasia offer a more comprehensive review of established and newer procedures. The chapter on treatment is expanded to include telerehab, drug treatment, brain stimulation and technologically based interventions. All major language intervention techniques are reviewed with outlined recommendations for clinicians. Part III on RHD consists of two revised chapters reflecting current terminology, research and clinical practice issues. Sections on neglect, deficit awareness, social communication and abstract language intervention have been updated. Part IV offers the most recent research on TBI rehabilitation. Research on teaching compensatory strategies, group therapy and community reentry has been updated with clinical recommendations. Part V's two chapters on dementia include new information on changing incidence and prevalence patterns of dementia, infectious and rapidly progressive dementias, frontotemporal dementias, primary progressive aphasia and HIV associated neurocognitive disorders. *Handbook of Social Sciences and Global Public Health* Pranee Liamputtong, 2023-09-09 This handbook highlights the relevance of the social sciences in global public health and their significantly crucial role in the explanation of health and illness in different population groups, the improvement of health and the prevention of illnesses around the world. Communication Disability in the Dementias Karen Bryan, Jane Maxim, 2006-03-30. This book focuses on language and communication issues with older people with mental health problems. Radically revised and updated from the authors' earlier book *Communication Disability and the Psychiatry of Old Age*, this book recognizes that language and communication is not just the business of speech and language therapy but is relevant to all staff involved with people who have mental health difficulties. This book focuses on what older people with mental health difficulties require to maintain their independence and to minimize the effects of degenerative disease processes for as long as possible from a speech and language perspective. Relevant to all members of the multidisciplinary team involved within older people's mental health services. Each chapter is evidence based and factual. Reflects the substantial advances in the diagnosis and treatment of dementias.

Dementia Ellen Hickey, Michelle S. Bourgeois, 2017-12-19. Person-centered care for persons with dementia has been developed and expanded over the last few decades. Speech language pathologists are uniquely positioned to understand the striking impact that communication challenges have on persons with dementia and their caregivers and can lead the charge to improve access to communication and participation. This volume serves as a starting point and reference manual for those who want to provide person-centered and life-enhancing services to persons with dementia and to inspire the continued generation of quality research to demonstrate the value of cognitive communication behavioral and caregiver interventions. It serves as a call to action for an interprofessional team of healthcare providers across healthcare settings to promote meaningful life engagement in persons with dementia using evidence-based assessment and intervention approaches. This volume provides background on the evolution of caring for persons with dementia as well as a description of the diagnostic process for dementia syndromes and the cognitive and communication

characteristics of dementias with an emphasis on Alzheimer's dementia. Its chapters cover the person-centered assessment process for persons with cognitive and communicative disorders of dementias, intervention approaches for the wide variety of cognitive, communicative, eating, swallowing, and behavioral symptoms, and consequences of dementia syndromes, reimbursement and documentation issues for various settings in which persons with dementia are seen, and issues and challenges of quality of life and end-of-life care.

The Strange Tools of Human Communication Ruth Finnegan, 2025-05-27

The Strange Tools of Human Communication The Voice, the Pen, and the Lyre is a thought-provoking exploration of the everyday tools of communication that weaves together history, art, and science to reveal how the voice, hand, and mind shape our shared experiences. Through a blend of scholarly research, personal insights, and field experiences from the oral tales of Sierra Leone's Limba storytellers to ancient cave art and modern iconography, this book offers fresh perspectives on how we connect across time and cultures. Challenging the idea that spoken language alone defines humanity, it emphasises the crucial role of hands, gestures, and artistic forms as the foundation of human communication. Readers are invited to consider the possibility of an ancestral shared consciousness and the mysterious similarities in ancient art worldwide. Through vivid examples and personal insights, the book redefines communication as a blend of conscious expression and subconscious influence, inviting readers to consider the hidden connections that unite us across cultures and time, and to contemplate the future of communication. *The Strange Tools of Human Communication* is an ideal supplement to upper-level undergraduate and graduate courses in cultural anthropology, sociocultural linguistics, and cultural studies.

Care Giving for Alzheimer's Disease Verna Benner Carson, Katherine Johnson Vanderhorst, Harold G. Koenig, 2015-03-18

Veteran clinicians offer a unique framework for understanding the psychological origins of behaviors typical of Alzheimer's and other dementias and for providing appropriate care for patients as they decline. Guidelines are rooted in the theory of retrogenesis in dementia, that those with the condition regress in stages toward infancy as well as knowledge of associated brain damage. The objective is to meet patients where they are developmentally to best be able to address the tasks of their daily lives from eating and toileting to preventing falls and wandering. This accessible information gives readers a platform for creating strategies that are respectful, sensitive, and tailored to individual needs, thus avoiding problems that result when care is ineffective or counterproductive. Featured in the coverage: Abilities and disabilities during the different stages of Alzheimer's disease; Strategies for keeping the patient's finances safe; Pain in those with dementia and why it is frequently ignored; Help, I've lost my mother and can't find her; Sexuality and intimacy in persons with dementia; Instructive vignettes of successful caring interventions. Given the projected numbers of individuals expected to develop dementing conditions, *Care Giving for Alzheimer's Disease* will find immediate interest among clinical psychologists, health psychologists, psychiatrists, social workers, and primary care physicians.
