Computer Vision and Internet of Everything (IoE) for Societal Needs Pandey, Rajiv,Maurya, Pratibha,Singh, Neeraj Kumar,Tiwari, Anil Kumar,Prajapati, Jigna,2025-05-01 The Internet of Everything IoE has been enabled by various technologies and applications IoE consists of sensors and actuators software features that enable processing ability and interoperability across devices and protocols IoE has started revolutionizing many industries and sectors resulting in better overall efficiency and cost savings such as better information and resource sharing and better supply chain efficiency

Computer vision trains computers to capture and interpret information from image and video data. Thus IoE and computer vision have novel applications in upgrading the services in healthcare, disaster prediction and monitoring, smart agriculture, solutions, water sustainability, environment sustainability, climate change, and many more. Computer Vision and Internet of Everything IoE for Societal Needs explores the utilization of the Internet of Everything IoE with computer vision. It examines its underlying technologies in different application areas crucial to sustainable development and societal needs. Covering topics such as assistive technology, geriatric support, and social engineering, this book is an excellent resource for computer engineers, business professionals, researchers, scholars, academicians, and more.

Instrumentation for Civil Engineering Applications Ashim Kanti Dey, Manita Das, 2025-06-01 *Handbook of Research on Emerging Trends and Technologies in Library and Information Science* Kaushik, Anna, Kumar, Ashok, Biswas, Payel, 2019-11-22 With the perpetual advancements of technology, library and information science professionals are tasked with understanding these technologies and providing accurate and comprehensive information to other potential users. These professionals must develop best practices for understanding these technologies in order to best serve other users. The Handbook of Research on Emerging Trends and Technologies in Library and Information Science is a critical research book that examines advancing technologies and new innovations and their influences on library and information sciences for improved best practices. Featuring an array of topics such as digital libraries, distance education, and information literacy, this publication is essential for librarians, knowledge managers, information retrieval specialists, library and information science professionals, information scientists, researchers, web librarians, academicians, educators, IT specialists, and managers.

AI Applications for Clean Energy and Sustainability Riswandi, Budi Agus, Singh, Bhupinder, Kaunert, Christian, Vig, Komal, 2024-08-16 The global demand for clean energy solutions, the urgency of addressing climate change, continue to intensify, and as such, the need for innovative approaches becomes increasingly paramount. However, navigating the complex landscape of clean energy production and sustainability presents significant challenges. Traditional methods often fall short in efficiently optimizing renewable energy systems and mitigating environmental impacts. Moreover, the integration of artificial intelligence (AI) into the energy sector remains underexplored despite its potential to revolutionize operations and drive sustainable development. AI Applications for Clean Energy and Sustainability emerges working to tackle these pressing issues. This comprehensive volume delves into the transformative power of AI in revolutionizing clean energy production, distribution, and management. By harnessing machine learning, algorithms, data analytics, and optimization techniques, the book offers innovative solutions to enhance the efficiency, reliability, and scalability of renewable energy systems. Through real-world case studies and practical examples, it illustrates AI's potential to optimize energy infrastructure, monitor marine ecosystems, and predict climate change impacts, thereby paving the way for a more sustainable future.

Technologies for Sustainable Healthcare Development Murugan, Thangavel, W., Jaisingh, P., Varalakshmi, 2024-07-26 In contemporary healthcare industry, 50 technologies present a

paradoxical challenge and opportunity The rapid integration of Cyber Physical Systems Cloud Computing Internet of Things Artificial Intelligence Smart Factories and Cognitive Computing has ushered in unprecedented transformations yet it has concurrently given rise to critical vulnerabilities within healthcare systems As sensitive patient data becomes increasingly digitized the specter of cybersecurity threats looms larger than ever The book titled Technologies for Sustainable Healthcare Development undertakes the crucial task of addressing this pressing concern Focused on Cybersecurity and Data Science Innovations in Industry 5 0 Technologies for Sustainable Healthcare it serves as an indispensable guide for professionals researchers and policymakers aiming to fortify healthcare systems against unauthorized access and cyber threats while unlocking the potential of transformative technologies The overarching objective of Technologies for Sustainable Healthcare Development is to dissect the challenges posed by the convergence of cybersecurity data science and Industry 5 0 in healthcare This timely publication delves into the evolution of cybersecurity and data science providing insights into their symbiotic relationship and the implications for healthcare Through its exploration of cutting edge research innovative solutions and practical applications the book becomes a beacon for those seeking to navigate the evolving landscape of secure healthcare development It does not merely dissect problems but endeavors to provide sustainable development strategies contributing to the advancement of robust and efficient healthcare systems **Parliamentary Debates** India.
