Towards digital inclusion in rural transformation Hernandez, K., Flynn, J., He, J., Alsahi, H., 2024-05-09 The rapid and ongoing digital transformation of government economic and social sectors holds immense potential to improve outcomes

across the SDGs for smallholder farmers and rural communities more generally Author However it is also widely recognized that digitalization alone does not guarantee inclusion Author Rural residents and marginalized groups have the most to gain from digitalization but are also the most at risk of falling further behind due to digital divides Author The resulting paradox may leave rural development actors unsure about how to best approach rural digital transformation Author This report helps rural development practitioners and decision makers work through this paradox Author It does so by highlighting the factors that lead to digital exclusion providing evidence regarding how digital divides play out and providing recommendations on how to improve digital inclusion for rural areas and marginalized groups Author *Framework for the Integration of Mobile Device Features in PLM* Hopf, Jens Michael, 2016-07-01 Currently companies have covered their business processes with stationary workstations while mobile business applications have limited relevance Companies can cover their overall business processes more time efficiently and cost effectively when they integrate mobile users in workflows using mobile device features The objective is a framework that can be used to model and control business applications for PLM processes using mobile device features to allow a totally new user experience
