Missile Guidance And Control Systems:

Missile Guidance and Control Systems George M. Siouris, 2004-03-09 Though originally inspired by military applications the advent of missile guidance and control systems has led to applications in a variety of fields in robotics industrial process control and in commercial transportation networks such as Global Positioning System technology This book offers a comprehensive and up to date account of the technology behind tactical and strategic missiles and the guidance control and instrumentation required to reach a given target Topics covered include missile aerodynamic forces and moments the missile mathematical model weapon delivery GPS Global Positioning System and TERCOM terrain contour matching guidance cruise missile mechanization equations and a detailed analysis of ballistic missile guidance laws The presentation assumes familiarity with calculus ordinary differential equations and some knowledge of modern control theory The text is replete with practical examples designed to illustrate important concepts This book will be an essential resource for students of aeronautical aerospace engineering as well as practicing engineers involved in the design development and analysis of modern aerospace guidance and control systems Missile Guidance and Control Systems George M. Siouris, 2006-05-07 Airborne Vehicle Guidance and Control Systems is a broad and wide angled engineering and technological area for research and continues to be important not only in military defense systems but also in industrial process control and in commercial transportation networks such as various Global Positioning Systems GPS The book fills a long standing gap in the literature The author is retired from the Air Force Institute and received the Air Force s Outstanding Civilian Career Service Award **Missile Guidance and Control Systems** Mr. Rohit Manglik, 2024-07-14 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels Design of Guidance and Control Systems for Tactical Missiles Qi Zaikang, Lin Defu, 2019-09-09 Design of Guidance and Control Systems for Tactical Missiles presents a modern comprehensive study of the latest design methods for tactical missile guidance and control It analyzes autopilot designs seeker system designs guidance laws and theories and the internal and external disturbances affecting the performance factors of missile guidance control systems The text combines detailed examination of key theories with practical coverage of methods for advanced missile guidance control systems It is valuable content for professors and graduate level students in missile guidance and control as well as engineers and researchers who work in the area of tactical missile guidance and control **Advances in Missile Guidance, Control, and Estimation** S.N. Balakrishnan, A. Tsourdos, B.A. White, 2012-09-05 Stringent demands on modern guided weapon systems require new approaches to guidance control and estimation There are requirements for pinpoint accuracy low cost per round easy upgrade paths enhanced performance in counter measure environments and the ability to track low observable targets Advances in Missile Guidance

Control and Estimation brings together in one volume the latest developments in the three major missile control components guidance control and estimation as well as advice on implementation It also shows how these elements contribute to the overall missile design process Shares Insights from Well Known Researchers and Engineers from Israel Korea France Canada the UK and the US The book features contributions by renowned experts from government the defense industry and academia from the United States Israel Korea Canada France and the United Kingdom It starts from the ground up developing equations of missile motion It reviews the kinematics of the engagement and the dynamics of the target and missile before delving into autopilot design guidance estimation and practical implementation issues Covers Nonlinear Control Techniques as Well as Implementation Issues The book discusses the design of autopilots using new nonlinear theories and analyzes the performance over a flight envelope of Mach number and altitude It also contains a chapter on the recent integrated guidance and control approach which exploits the synergy between the autopilot and guidance system design The book then outlines techniques applied to the missile guidance problem including classical guidance sliding mode based and differential game based techniques A chapter on the use of differential games integrates the guidance law with the estimation of the target maneuver A chapter on particle filter describes the latest development in filtering algorithms The final chapters written by engineers working in the defense industry in the US Israel and Canada consider the design and implementation issues of a command to line of sight guidance system and autopilots An Invaluable Resource on the State of the Art of Missile Guidance A guide to advanced topics in missile guidance control and estimation this invaluable book combines state of the art theoretical developments presented in a tutorial form and unique practical insights It looks at how tracking guidance and autopilot algorithms integrate into a missile system and guides control system designers through the challenges of the design process
