Wright,M. Beaumont,2014-12-03 This book brings together the voices of teacher educators working in different national and educational settings It Covers themes such as change in teacher education practices the influences of context on practice and of interculturality to provide rich insights into the processes and effects of second language teacher education Multiple Affordances of Language Corpora for Data-driven Learning Agnieszka Leńko-Szymańska,Alex Boulton,2015-05-15 In recent years corpora have found their way into language instruction albeit often indirectly through their role in syllabus and course design and in the production of teaching materials and other resources An alternative and more innovative use is for teachers and students alike to explore corpus data directly as part of the learning process This volume addresses this latter application of corpora by providing research insights firmly based in the classroom context and reporting on several state of the art projects around the world where learners have direct access to corpus resources and tools and utilize them to improve their control of the language systems and skills or their professional expertise as translators Its aim is to present recent advances in data driven learning addressing issues involving different types of corpora for different learner profiles in different ways for different purposes and using a variety of different research methodologies and perspectives Impact of Digital Transformation in Teacher Training Models Afonso, Ana,Morgado, Lina,Roque, Licínio,2022-02-11 A new reality of teaching and learning through technology is continually on the rise creating the need for governments organizations teachers students and families to adapt Students are realizing the need to become more autonomous parents are having to become more present and teachers are assuming new roles in virtual education Although this new era of education is marked by innovation at all levels most of these changes have not been thoroughly planned or structured thus creating a difficult experience for all the educational stakeholders Impact of Digital Transformation in Teacher Training Models conducts a critical discussion on teacher preparedness in the digital transformation of teaching practices It promotes practitioner reflections on the role of institutional policies teacher digital literacy the digital divide and how the ongoing digital transformation of society will induce the need for a paradigm shift in teacher training models Covering topics such as emergency remote education emerging pedagogies and massive open online courses this book is an essential resource for policymakers government officials education administration pre service teachers educators researchers and academicians

Assessing Second Language Pragmatics S. Ross,G. Kasper,2013-11-29 The first book length collection of studies on the assessment of pragmatic competencies in a second or foreign language Grounded in theoretical perspectives on communicative and interactional competencies it examines the reception and production of speech acts through a variety of assessment methods and quantitative and qualitative analyses *Data-Driven Learning for the Next Generation* Peter

Crosthwaite,2019-10-21 Despite advancements in and availability of corpus software in language classrooms facilitating data driven learning DDL the use of such methods with pre tertiary learners remains rare This book specifically explores the affordances of DDL for younger learners testing its viability with teachers and students at the primary and secondary years of schooling It features eminent and up and coming researchers from Europe Asia and Australasia who seek to address best practice in implementing DDL with younger learners while providing a wealth of empirical findings and practical DDL activities ready for use in the pre tertiary classroom Divided into three parts the volume s first section focuses on overcoming emerging challenges for DDL with younger learners including where and how DDL can be integrated into pre tertiary curricula as well as potential barriers to this integration It then considers new cutting edge innovations in corpora and corpus software for use with younger learners in the second section before reporting on actual DDL studies performed with younger learners and or their teachers at the primary and secondary levels of education This book will appeal to post graduate students academics and researchers with interests in corpus linguistics second language acquisition primary and secondary literacy education and language and educational technologies Project-Based Learning Applied to the Language Classroom Juliana Franco Tavares/ Louise Emma Potter,2018-03-05 In Project Based Learning Applied to the Language Classroom the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren t enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social Studies and Science However there are few published works about the specifics of PBL in foreign language classes Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language
