Collective Decision Making in Rural Japan

Robert Marshall, 1984-01-01 This study is a result of three continuous years of fieldwork in a hamlet in rural Japan. The data presented and analyzed here consist of records from participant observation, formal and informal interviews, casual conversation, and formal questionnaires and public and private documents. The subject of this research is group decision making and the results of this process are after all a matter of public record. The major conclusions of this study are outlined in their simplest and most straightforward form. A hamlet is fundamentally a nexus for the organization of productive exchange among member households; the form of exchange through which two or more parties actively combine their resources to produce something of value not available or as cheaply available to any of them separately. Defection from productive exchange agreements by hamlet members is reduced by making access to future valuable transactions and corporate property contingent upon the integrity of each current exchange transaction. This method of combining a common interest in production with contingent access to productive resources is termed mutual investment and is the major source of consensus in hamlet decision making. When only cooperative resources are at issue, decisions regularly result in unanimity. When a course of action can be implemented only if hamlet members relinquish control over individually held resources, a division will emerge among the membership. Whether or not a formal vote is taken, the distribution of differing opinion will be known through more informal means of communication. In all cases of division, by the time the course of action to be implemented is formally announced, the minority in opposition will be extremely small. The question then must be resolved whether those in the minority will participate in the implementation or resign as hamlet members. This book is written with two rather disparate audiences in mind: readers interested primarily in exchange and decision making phenomenon on the one hand, and readers interested primarily in the unity of experience represented by the Japanese sensibility on the other.

Tragic Views of the Human Condition Lourens Minnema, 2013-06-06 Can tragic views of the human condition as known to Westerners through Greek and Shakespearean tragedy be identified outside European culture in the Indian culture of Hindu epic drama? In what respects can the Mahabharata epics and the Bhagavadgita's views of the human condition be called tragic in the Greek and Shakespearean senses of the word? Tragic views of the human condition are primarily embedded in stories. Only afterwards are these views expounded in theories of tragedy and in philosophical anthropologies. Minnema identifies these embedded views of human nature by discussing the ways in which tragic stories raise a variety of anthropological issues, such as coping with evil, suffering, war, death, values, power, sacrifice, ritual, communication, gender, honour, injustice, knowledge, fate, freedom. Each chapter represents one cluster of tragic issues that are explored in terms of their particular Greek, English, Indian settings before being compared cross-culturally. In the end, the underlying question is: are Indian views of the human condition very different from Western views?

Education's Abiding Moral

Dilemma Sheldon Rothblatt, 2007-05-14 The conflict between access and quality in education has been front page news for

decades Policies regarding the role of elite universities the organisation of secondary education admissions criteria courses of study high stakes testing and fiscal and programme accountability have changed with uncommon frequency resulting in confusion and uncertainty Yet it is the argument of this book that the tension between access to education and the preservation of quality is another chapter in the much longer history of merit selection in England Scotland and America and should be seen in its proper contexts The underlying cause of the difficulties however is the dilemma created by two competing conceptions of virtue one determined by merit judged competitively and the other more vaguely but emotionally supported by a broader view of worth Merit is consistent with liberal democracy but worth is the special province of social democracy None of the distinctions is easily categorised by political party or ideology They are the result of opposite moral impulses inherent in plural democratic societies undergoing the strains of internal and global competition

Shakespeare and Crisis Silvia Bigliuzzi, 2020-06-15 Shakespeare and Crisis One hundred years of Italian narratives explores how Shakespeare intervened in the Italian socio political and cultural scene between his third and fourth centenaries at times which were manifestly perceived as critical It asks which complex mythopoietic processes contributed to shaping regimes of reading Shakespeare in response to those times of crisis Crises of national identity during the Great War and the Fascist regime crises of history in the 1970s and crises of representation in the second half of the twentieth century extending into the new millennium constitute the three main areas of a discussion that ultimately aims at probing into the role of literature at times of crisis The volume situates itself at the juncture of European Shakespeare studies and studies of Shakespeare and Italy It addresses essential questions about the position of literature in society offering at different levels new insights for scholars students and the general reader
