Value-creation in Middle Market Private Equity John A. Lanier, 2016-02-17 Value creation in Middle Market Private Equity by John A Lanier holistically examines the ecosystem relationships between middle market private equity firms and their portfolio companies Small business is the job creating engine in the US economy and consequently is a prime target market for private equity investment Indeed private equity backs over six of each 100 private sector jobs Both the small businesses in which private equity firms invest and the private equity firms making the investments face inter and intra company fiduciary leadership challenges while implementing formulated strategy The architecture of each private equity firm portfolio company relationship must be uniquely crafted to capitalize on the projected return on investment that is memorialized in the investment thesis Given the leveraged capital structure of portfolio companies the cost of a misstep is problematic Individual private equity professionals are typically members of

multiple investment teams for the firm Not only may each investment team have its own unique leadership style but its diverse members have to assimilate styles for each team in which they participate relative to a specific portfolio company Acquisitions and their subsequent integrations add exponential complexity for both private equity investment and portfolio company leadership teams indeed cultural integration ranks among the most chronic acquisition obstacles Accordingly the stakeholders of private equity transactions do well to embrace leadership best practices in applying value creation toolbox best practices The perspectives of both the private equity investment team and the portfolio company leadership team are within the scope of these chapters

Klier,2009-05-28 There has been a long tradition of research on the relation between diversification and performance of public corporations in the strategy and finance fields As for private equity portfolios research on this matter is rather scarce From a theoretical as well as from a practical perspective however it is interesting to know more about the relation between private equity portfolio diversification and performance how private equity firms manage their portfolios and what public companies can learn from private equity firms These are the research questions which are addressed in Daniel Klier's research In order to answer these questions the author uses a two tier research design As a first step he compares the diversification performance link of public corporations and private equity firms With respect to the private equity sample and the operationalization of the relevant variables the study is highly innovative in terms of generating the PE sample from databases like Preqin and Dealogic constructing a diversification measure from transaction data and developing comparable performance measures for private equity firms as well as traditional multi business firms As the second step which is exploratory in nature the author explores management models of PE firms The sample of 20 US and Europe based private equity firms is unique and of high quality because the author succeeded in getting in depth interviews with top decision makers of PE firms The exploratory study extracts three clusters of management models that PE firms are using and their relation to performance **Academic and Educational Entrepreneurship** Mehtap Aldogan Eklund,Gabrielle
