## **Process Management and Burnout Prevention**

Yevgen Bogodistov, Jürgen Moormann, 2024-07-03 How can we work towards ensuring that organisations are robust and highly productive and avoid issues such as tiredness, burnout, high employee turnover, motivational issues or problems with the emotional climate? Bringing together the fields of process management and organisational behaviour for the first time, this book provides sorely needed practical guidance on how organisations can diagnose, anticipate and address psychological issues in their workforces as well as process vulnerabilities in their operations. Advocating for a human-centred approach to process management, the authors help discover and prevent negative psychological issues related to emotional exhaustion. This book offers a step-by-step toolkit for burnout recognition and systematic prevention using established process management tools. Thus, the book offers a deep look into psychological aspects far beyond classical process management.
