Gardner And Lambert 1959 Fifty Years And Counting:

Contemporary Language Motivation Theory Ali H. Al-Hoorie, Peter D. MacIntyre, 2019-11-18 This book brings together contributions from the leaders of the language learning motivation field. The varied chapters demonstrate how Gardner's work remains integral to a diverse range of contemporary theoretical issues underlying the psychology of language even today 60 years after the publication of Gardner and Lambert's seminal 1959 paper. The chapters cover a wide selection of topics related to applied linguistics, second language acquisition, social psychology, sociology, methodology, and historical issues. The book advances thinking on cutting edge topics in these diverse areas, providing a wealth of information for both students and established scholars that show the continuing and future importance of Gardner and Lambert's ideas.

Motivation and Second Language Acquisition Robert C. Gardner, 2010 Offering a historical and empirical account, this book provides a comprehensive overview of the socio-educational model of second language acquisition. This approach to understanding motivational variables that promote success in the learning of a second or foreign language, distinguishing between language classroom motivation and language learning motivation, is a major one in the history of this field of research. Chapters include a discussion of the definition and measurement of motivation, historical foundations of the model, recent studies with the International Attitude Motivation Test Battery for English as a foreign language in different countries, the implications of the model to the classroom context, and a discussion of criticisms and misconceptions of the model. The book provides graduate students and researchers with unique coverage of this research-oriented approach, as well as serving as a source book for the area. It is ideal for courses on motivation in second language learning or as a supplemental text for research-oriented courses in applied linguistics, educational psychology, or language research in general. *Language*

Learning Motivation in Japan Matthew T. Apple, Dexter Da Silva, Terry Fellner, 2013-09-27 This book synthesises current theory and research on L2 motivation in the EFL Japanese context, covering topics such as the issues of cultural identity, demotivation, language communities, positive psychology, possible L2 selves, and internationalisation within a key EFL context. The studies examine L2 motivation in primary, secondary, and tertiary education, utilising a wide variety of research methodologies to do so. *L2 Selves and Motivations in Asian Contexts* Matthew T. Apple, Dexter Da Silva, Terry Fellner, 2016-11-23 This book fills an existing gap in language learning motivation research by examining the applications of current motivational theories and models from WEIRD (Western, educated, industrialized, rich, developed) contexts to educational systems in Asian contexts. All chapters are focused on second language L2 motivation as it applies to the EFL situation in Asian countries where English is a mandatory subject in school. Themes in the volume cover the use of possible L2 selves as a theoretical model of motivation, the role of teacher motivation and demotivation in non-European educational systems, study abroad motivation among adolescents, cross-cultural differences in learner motivation among Asian cultures, and the influence of native-speakerism on language motivation and cultural identity. This book will appeal to ESL/EFL
