Written by Chris Curtis *How to Teach English* Novels non fiction and their artful navigation is jam packed with enlivening ideas to help teachers make the subject of English more intellectually challenging for students and to make it fun too Never underestimate your duty and power as a teacher of English English teachers help students to think and feel They prompt them to reflect on their actions They hold a mirror to society and inspire students to see how they can make it better What other subject does that This insightful interpretation of what makes excellent secondary school English teaching is the work of a man whose humility fails to hide his brilliance and provides educators with a sophisticated yet simple framework upon which to hook their lessons Covering poetry grammar Shakespeare and how to teach writing Chris Curtis has furnished every page of this book with exciting ideas that can be put into practice immediately Each chapter presents a store of practical strategies to help students in key areas providing apposite examples teaching sequences and the rationale behind them and has been accessibly laid out so that teachers can pinpoint the solutions they need without having to spend an age wading through academic theory and pontification The book explores the wealth of learning opportunities that can be derived from

both classic and more contemporary literature and offers expert guidance on how teachers can exploit their own chosen texts to best effect with their students Furthermore it is replete with ready to use approaches that will help teachers upgrade their lesson planning enhance their classroom practice and ensure that the content they cover sticks in their students heads for months and years afterwards Suitable for all English teachers of students aged 11 18     [The Lost Girls: Why a feminist revolution in education benefits everyone](#) Charlotte Woolley,2020-03-20 Life for girls is a battle of contrasting expectations being told you should be empowered but also be a good girl putting others first but still striving for perfection yourself This conflict internalizing expectations of an impossible standard has lead to an explosion in mental health and anxiety related disorders in young women The traditional narrative of education feeds the perception that girls are good They achieve work hard are co operative They achieve better grades But where do these high achievers disappear to They aren t becoming CEOs politicians or social leaders Women are still disproportionately the family carers and domestic managers This book explores research around biological difference and how our schools encode gendered expectations how our curricula can provide role models as well as modes of thinking valuing traditionally feminine traits as equal to masculine using psychological approaches to develop girls independence how school systems and leadership can model approaches to encourage all students to create a gender balanced environment With practical questions and suggestions at the end of each chapter this book is a guide to the research and a tool to help teachers and leaders shape a genuinely empowering school experience for young women     **Ontologies of English** Christopher J. Hall,Rachel Wicaksono,2020-01-02 A critical examination of the ways in which English is conceptualised for learning teaching and assessment in a range of domains from both social and cognitive perspectives Researchers and postgraduates working on English in L1 and L2 educational contexts will find it valuable for research and collaboration     *Nineteenth Century Prose* ,2019     **Talking about Oracy: Developing communication beyond the classroom** Sarah Davies,2020-12-17 Whether considering the art of debate understanding dialogic teaching methods the necessity of questioning or the ability to assess and develop these skills this book has been written by a classroom teacher for classroom teachers in the hope that oracy is dragged out of the shadows and recognised for its significance to improving students life skills and future aspirations When we think about the transferable skills all students will take with them post academia oracy literacy and numeracy should logically stand proudly side by side This triad of skillsets are the key components that are used to measure intellectual development in childhood as well as being further instilled and nurtured in all students throughout their education However as children become students and as these students become critical thinkers an element of this crucial triad appears to have been disowned in recent years In 2020 oracy appeared to have even less relevance in academia with the only supportive provision for both Language and Literature to deal with any missed learning being the eradication of any recorded proof of this skill Yet another indication that oracy has in some circumstances been cast into the shadows and banished into the realm of the

subject specific curricular We need to be realistic and embrace the idea that this skill is a necessity to success for all learners post academia Training students in the ability to communicate effectively with different audiences in different contexts needs to be brought back into the spotlight in the hopes that we can attempt to resolve any misconceptions regarding oracy s place in the curriculum Through the recognition of the theoretical understanding of communication that will provide the foundations for this book the aim is that it acts as a supportive guide that will provide suggestions and strategies in order to hopefully empower and encourage educators in all subjects in education thus restoring the use and appreciation for this necessary skill both inside and outside the classroom For so long focus has been on the stress and rigor of assessments and the fulfilment of the curriculum to ensure that all students can navigate their GCSE examinations This book will question whether this will have a detrimental effect on students who may have been exposed to fewer of the skills that they will require when leaving an educational setting and venturing into everyday life So let s address the elephant in the room and provide it a voice
