Preferred route of metastasis	Lymph	Blood
In situ phase	Yes	No
Age group	Usually over 50 years	Usually between 20 years

Although some general differences exist between the main groups of malignant tumours (Table 11.2), individual lesions have to be categorised more precisely both in clinical practice and for epidemiological purposes. It is inadequate to label the patient's tumour as merely having an epithelial or connective tissue origin; efforts must be made to determine the precise cell type. The classification of individual tumours is vitally important. Thorough histological examination of the tumour, sometimes using special techniques like genetic analysis and immunocytochemistry, detects subtle features that betray its provenance.

Histological grade (degree of differentiation)

The extent to which the tumour resembles histologically its cell or tissue of origin determines the tumour grade (Fig. 11.11) or degree of differentiation. Benign tumours are not usually further classified in this way because they nearly always closely resemble their parent tissue and grading the degree of differentiation offers no further clinical benefit in terms of choosing the most appropriate treatment. However, the degree of differentiation of malignant tumours is clinically useful both because it correlates strongly with patient survival (prognosis), and because it often indicates the most appropriate treatment. Thus, malignant tumours are usually graded either as well, moderately or poorly differentiated, or numerically, often by strict criteria, as grade 1, grade 2 or grade 3.

A well-differentiated tumour more closely resembles the parent tissue than does a poorly differentiated tumour, while moderately differentiated tumours are intermediate between these two extremes. Poorly differentiated tumours are more aggressive than well-differentiated tumours.

A few tumours are so poorly differentiated that they lack easily recognisable histogenetic features. There may even be great difficulty in deciding whether they are carcinomas or lymphomas, for example, although immunocytochemistry and genetic analysis often enable a distinction to be made. Tumours defying precise histogenetic classification are often referred to as 'anaplastic', or by some purely descriptive term such as 'spindle cell' or 'small round cell' tumour. Fortunately, advances

General And Systemic Pathology 5th Edition:

General and Systematic Pathology E-Book James C. E. Underwood, Simon S Cross, 2009-05-11 This highly acclaimed textbook is written specifically for students of medicine and related health science subjects. It progresses from a review of general pathology principles and disease mechanisms through detailed discussions of the pathologic entities associated with each organ system. Nearly 700 full color photographs and pathology slides bring the content to life. The fifth edition features extensive updates throughout to reflect the latest discoveries in cellular and molecular pathology and offers a web site that presents self assessment material and illustrated clinical case studies. Contents perfectly matches needs on medical students. Very clinical approach matches integrated courses. Extensive International Advisory Board validates contents. Each organ system chapter begins with a brief review of normal structure and function emphasizing aspects that are important to an understanding of the subsequently discussed disease processes. Offers a superb collection of clinical photographs, histopathology images and graphics approximately 700 in all that richly depict the appearance of both healthy and diseased tissues. New co editor Dr Simon Cross. Structure of chapters revised to make the book much easier to use during courses that are problem or case based. Several new contributors and re written chapters. Expanded International Advisory Board. *The Urology Bank of 1111 Mcqs* Dr. Atif A. Katib, 2019-08-28 We aim at testing knowledge acquisition and application albeit data analysis is tested in fewer instances. The questions are presented in Calibri body theme font to provide the best readability. The questions stems are short bold and typed in size 14 font. Each question has four options. It is hard for a test taker who doesn't know the answer to guesstimate. We have used plausible distractors and avoided double negatives. Furthermore we have used the finished and unfinished statement styles and avoided complex structures of questions. We have implemented the how common is and what is the likelihood that styles of questions as we believe that the reader's intuition and clinical sense last longer in mind than figures do. **Crash Course Pathology E-Book** Philip Xiu, 2012-04-25 The new series of Crash Course continues to provide readers with complete coverage of the MBBS curriculum in an easy to read user friendly manner. Building on the success of previous editions the new Crash Courses retain the popular and unique features that so characterised the earlier volumes. All Crash Courses have been fully updated throughout. More than 130 illustrations present clinical diagnostic and practical information in an easy to follow manner. Friendly and accessible approach to the subject makes learning especially easy. Written by students for students authors who understand exam pressures. Contains Hints and Tips boxes and other useful aide m moires. Succinct coverage of the subject enables sharp focus and efficient use of time during exam preparation. Contains a fully updated self assessment section ideal for honing exam skills and self testing. Self assessment section fully updated to reflect current exam requirements. Contains common exam pitfalls as advised by faculty. Crash Courses also available electronically. Online self assessment bank also available content edited by Dan Horton Szar. Now celebrating over 10 years of success Crash Course has been specially devised to help you get through your exams with

ease Completely revised throughout the new edition of Crash Course is perfectly tailored to meet your needs by providing everything you need to know in one place Clearly presented in a tried and trusted easy to use format each book in the series gives complete coverage of the subject in a no nonsense user friendly fashion Commencing with Learning Objectives each chapter guides you succinctly through the topic giving full coverage of the curriculum whilst avoiding unnecessary and often confusing detail Each chapter is also supported by a full artwork programme and features the ever popular Hints and Tips boxes as well as other useful aide m moires All volumes contain an up to date self assessment section which allows you to test your knowledge and hone your exam skills Authored by students or junior doctors working under close faculty supervision each volume has been prepared by someone who has recently been in the exam situation and so relates closely to your needs So whether you need to get out of a fix or aim for distinction Crash Course is for you **Lernkarten Krankheitslehre für**
