Natural Catastrophe Risk Management and Modelling Kirsten Mitchell-Wallace, Matthew Jones, John Hillier, Matthew Foote, 2017-04-24 This book covers both the practical and theoretical aspects of catastrophe modelling for insurance industry practitioners and

public policymakers Written by authors with both academic and industry experience it also functions as an excellent graduate level text and overview of the field Ours is a time of unprecedented levels of risk from both natural and anthropogenic sources Fortunately it is also an era of relatively inexpensive technologies for use in assessing those risks The demand from both commercial and public interests including re insurers NGOs global disaster management agencies and local authorities for sophisticated catastrophe risk assessment tools has never been greater and contemporary catastrophe modelling satisfies that demand Combining the latest research with detailed coverage of state of the art catastrophe modelling techniques and technologies this book delivers the knowledge needed to use interpret and build catastrophe models and provides greater insight into catastrophe modelling s enormous potential and possible limitations The first book containing the detailed practical knowledge needed to support practitioners as effective catastrophe risk modellers and managers Includes hazard vulnerability and financial material to provide the only independent comprehensive overview of the subject accessible to students and practitioners alike Demonstrates the relevance of catastrophe models within a practical decision making framework and illustrates their many applications Includes contributions from many of the top names in the field globally from industry academia and government Natural Catastrophe Risk Management and Modelling A Practitioner s Guide is an important working resource for catastrophe modelling analysts and developers actuaries underwriters and those working in compliance or regulatory functions related to catastrophe risk It is also valuable for scientists and engineers seeking to gain greater insight into catastrophe risk management and its applications

Decentralized Insurance Runhuan Feng,2023-05-21 The book offers an introduction to the technical foundation of decentralized insurance models for advanced undergraduate students graduate students and practitioners The book is self contained and anyone with a basic knowledge of probability and statistics should be able to follow through the entire book It adopts a minimalist approach to describe the essential elements and first principles so that readers can get a gist of these models without being overwhelmed with too much technicality It can be used as a reference for business model designs The inclusion of exercises and practical examples makes the book suitable for advanced courses on decentralized insurance and risk sharing There is a mix of industry practices and academic models presented in this book The exposition starts with an overview of historic and current business practices and preliminaries on the mathematics and economics of risk and insurance A bird s eye view of traditional insurance is provided as a benchmark for various topics to be used in contrast with decentralized insurance The book then continues with decentralized insurance practices around the world including online mutual aid originated in China takaful from the Islamic world peer to peer insurance in the West catastrophe risk pooling for Caribbean countries etc Theories of aggregate risk pooling and peer to peer risk exchanges are provided for readers to appreciate the mathematical foundation of risk sharing A unified framework of decentralized insurance is presented to show a structured approach to the economic design of decentralized business models The book ends with a technical review of
