Fundamentals Of Petroleum By Kate Van Dyke:

Fundamentals of Petroleum Kate Van Dyke, 1997 This book is designed as a basic guide to the practical aspects of the petroleum industry

The Politics of the Global Oil Industry Toyin Falola, Ann Genova, 2005-09-30 The petroleum industry is among the most lucrative and most important in the world and its impact within the realm of international politics is tremendous although it can be overstated Taking a well balanced and objective approach to the complicated web of political and economic threads that make up the fabric of the oil industry Falola and Genova introduce the most salient aspects in clear language offering cogent and up to date information about the countries companies international organizations and people who shape the contemporary history of the black gold The relationship of international politics and the global oil industry affects everyone but is understood by few Taking a well balanced and objective approach to deconstructing this intricate web for those unfamiliar with the industry Falola and Genova introduce the major players in the field offering cogent and up to date information about the countries companies organizations and people who shape the contemporary history of oil They break down the essentials describing the discovery process the different types of oil and the various processes by which oil gets to the market Then they provide a brief history of the major oil producing countries followed by a discussion of OPEC and international efforts to control the price and supply of oil After setting the stage they introduce the most salient political issues that are influenced by oil namely environmental protection human rights and economic development Finally a look at each of seven major oil exporters Iraq Mexico Nigeria Norway Russia Saudi Arabia and Venezuela demonstrates that the black gold can be both a blessing and a curse for the countries that produce it Despite the need to learn how to exploit alternative energy sources before the oil runs out we will continue to be dependent on oil for the foreseeable future Today's oil demands are not only generated by such obvious activities as gassing up our cars or powering our aircraft but also from the ubiquitous technological gadgets that have infiltrated our daily lives From computer monitors to CDs from cell phones to the petroleum generated materials used in our shoes and sweaters our reliance on oil continues to grow Because price and supply are highly dependent on political events in distant countries it is essential for American consumers to understand the intricacies of this complex subject Falola and Genova demystify the industry and invite us to investigate more deeply this vital resource

Extractive Activities in der IFRS-Rechnungslegung Ariane Kraft, 2016-11-16 Bislang finden sich in den IFRS keine umfassenden Regelungen zur Bilanzierung der extractive activities Das Anwendungsgebiet von IFRS 6 ist lediglich auf einen Ausschnitt der rohstoffverdernden Aktivitäten beschränkt nämlich auf die Explorations und Evaluierungsphase In IFRIC 20 wird ein weiterer Teilbereich der extractive activities die Erfassung von Abraumbeseitigungskosten in bestimmten Fällen thematisiert Die übrigen Sachverhalte des Upstream Geschäfts von Rohstoffunternehmen werden hingegen von keinem IFRS explizit adressiert Indes wurde IFRS 6 vom IASB zunächst als Interimsstandard veröffentlicht eine grundlegende Bearbeitung und Ausweitung des Anwendungsbereichs sollte folgen Doch

nach der anschließenden Veröffentlichung des Diskussionspapiers DP 2010 1 wurde die Standardentwicklung bis heute nicht weiter verfolgt und eine umfassende Lösung steht nach wie vor aus. Diese lückenhafte und zudem vielfach kritisierte Regelungslage nimmt die Verfasserin zum Anlass den aktuellen IFRS Regelungskanon für sämtliche Upstream Phasen der rohstofffördernden Aktivitäten zu konkretisieren und im Hinblick auf die Erfüllung des Ziels einer entscheidungsnützlichen Finanzberichterstattung kritisch zu würdigen. Besondere Bedeutung wird dabei u.a. der Frage der Aktivierungshöhe und des Aktivierungszeitpunkts verschiedener Ausgaben im Upstream Geschäft beigemessen. Auf den Erkenntnissen der Analyse und Würdigung aufbauend unterbreitet die Verfasserin sodann einen ganzheitlichen und konsistenten Bilanzierungsvorschlag, der nicht nur zu einer vergleichbareren sondern gleichermaßen entscheidungsnützlicheren Bilanzierung der extractive activities beitragen könnte.

Power Trip Michael E. Webber, 2019-05-07 A global tour of energy the builder of human civilization and also its greatest threat Energy is humanity's single most important resource In fact as energy expert Michael E Webber argues in Power Trip the story of how societies rise can be told largely as the story of how they manage energy sources through time In 2019 as we face down growing demand for and accumulating environmental impacts from energy we are at a crossroads and the stakes are high But history shows us that energy's great value is that it allows societies to reinvent themselves Power Trip explores how energy has transformed societies of the past and offers wisdom for today's looming energy crisis There is no magic bullet energy advances always come with costs Scientific innovation needs public support Energy initiatives need to be tailored to individual societies We must look for long term solutions Our current energy crisis is real but it is solvable We have the power

WHEEL OF FORTUNE Thane Gustafson, 2012-11-06 The world's largest exporter of oil is facing mounting problems that could send shock waves through every major economy Gustafson provides an authoritative account of the Russian oil industry from the last years of communism to its uncertain future The stakes extend beyond global energy security to include the threat of a destabilized Russia

Black Gold and Blackmail Rosemary A. Kelanic, 2020-05-15 Black Gold and Blackmail seeks to explain why great powers adopt such different strategies to protect their oil access from politically motivated disruptions In extreme cases such as Imperial Japan in 1941 great powers fought wars to grab oil territory in anticipation of a potential embargo by the Allies in other instances such as Germany in the early Nazi period states chose relatively subdued measures like oil alliances or domestic policies to conserve oil What accounts for this variation Fundamentally it is puzzling that great powers fear oil coercion at all because the global market makes oil sanctions very difficult to enforce Rosemary A Kelanic argues that two variables determine what strategy a great power will adopt the petroleum deficit which measures how much oil the state produces domestically compared to what it needs for its strategic objectives and disruptibility which estimates the susceptibility of a state's oil imports to military interdiction that is blockade Because global markets undercut the effectiveness of oil sanctions blockade is in practice the only true threat to great power oil access That combined with the

devastating consequences of oil deprivation to a state's military power explains why states fear oil coercion deeply despite the adaptive functions of the market. Together these two variables predict a state's coercive vulnerability which determines how willing the state will be to accept the costs and risks attendant on various potential strategies. Only those great powers with large deficits and highly disruptible imports will adopt the most extreme strategy: direct control of oil through territorial conquest.

American Book Publishing Record, 1997-09 *Fundamentals of Petroleum* Dyke Van Kate, 1997 *Direito do trabalho petrolífero embarcado* Carlos Humberto Rios Mendes Júnior, 2024-12-03

Direito do Trabalho Petrolífero Embarcado de Carlos Humberto Rios Mendes Júnior uma obra decorrente de sua dissertação de mestrado em Direito apresentada ao Programa de Pós-Graduação em Direito da Universidade Federal do Rio Grande do Norte PPGD UFRN. Este livro aprofunda-se nos desafios jurídicos, econômicos e regulatórios enfrentados pelo setor petrolífero brasileiro com um foco específico no trabalho embarcado em plataformas de petróleo. No primeiro capítulo Mendes Júnior explora o contexto histórico e estratégico do petróleo na Zona Econômica Exclusiva do Brasil incluindo uma análise detalhada das descobertas significativas na camada do pré-sal. Ele discute a evolução da legislação e das políticas de exploração petrolífera enfatizando o papel crítico que a indústria desempenha na economia nacional e as perspectivas futuras para o setor. No segundo capítulo o autor examina os princípios da proteção do trabalhador no contexto da Constituição Federal de 1988 e seu impacto sobre os trabalhadores da indústria petrolífera marítima. Mendes Júnior aborda os princípios e direitos fundamentais aplicáveis ao labor petrolífero embarcado discutindo as características específicas deste tipo de trabalho e as implicações legais associadas. O terceiro capítulo se concentra na flexibilização do trabalho terceirizado e questões relativas ao contrato internacional de trabalho na Zona Econômica Exclusiva. O autor analisa como a legislação trabalhista brasileira se aplica a esses contratos e os desafios enfrentados na regulação dessas relações de trabalho particularmente no que tange aos direitos e proteções dos trabalhadores em um contexto internacional. O último capítulo aborda a regulamentação do trabalho marítimo na indústria do petróleo no Brasil examinando a legislação infraconstitucional e as normas administrativas aplicáveis aos trabalhadores marítimos. Mendes Júnior detalha o impacto das normas regulamentadoras do Ministério do Trabalho da Marinha do Brasil e das convenções da Organização Internacional do Trabalho específicas ao trabalho marítimo. *Direito do Trabalho Petrolífero Embarcado* oferece uma visão abrangente e crítica sobre as complexas interações entre direito político e economia no setor de petróleo brasileiro destacando as especificidades do trabalho embarcado e propondo reflexões sobre as melhorias regulatórias necessárias para garantir a segurança e os direitos dos trabalhadores. Uma leitura essencial para profissionais e estudiosos do direito político, energético e gestão de recursos humanos no contexto das indústrias extrativas.
