bedeuten *The Long Game* Rush Doshi, 2021-06-11 For more than a century no US adversary or coalition of adversaries not Nazi Germany Imperial Japan or the Soviet Union has ever reached sixty percent of US GDP China is the sole exception and it is fast emerging into a global superpower that could rival if not eclipse the United States What does China want does it have a grand strategy to achieve it and what should the United States do about it In *The Long Game* Rush Doshi draws from a rich base of Chinese primary sources including decades worth of party documents leaked materials memoirs by party leaders and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War Taking readers behind the Party's closed doors he uncovers Beijing's long methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential strategies of displacement Beginning in the 1980s China focused for two decades on hiding capabilities and biding time After the 2008 Global Financial Crisis it became more assertive regionally following a policy of actively accomplishing something Finally in the aftermath populist elections of 2016 China shifted to an even more aggressive strategy for undermining US hegemony adopting the phrase great changes unseen in century After charting how China's long game has evolved Doshi offers a comprehensive yet asymmetric plan for an effective US response Ironically his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar for dollar ship for ship or loan for loan

Die lautlose Eroberung Clive Hamilton, Mareike Ohlberg, 2020-05-11 Gefährlicher Rivale statt unverzichtbarer Partner Mit welchen Strategien China die Welt erobert Chinas Aufstieg zur Weltmacht ist unaufhaltsam Lange erwartete man dass sich das Land mit zunehmendem Wohlstand demokratisieren würde Doch das Gegenteil ist der Fall Die Kommunistische Partei Chinas will sich mit allen Mitteln an der Macht halten Dafür werden Wirtschaft und Gesellschaft im eigenen Land auf Linie gebracht und ein weitreichendes Programm wurde entwickelt mit dem China die westlichen Demokratien unterwandert und eine neue Weltordnung etablieren will Dabei setzt es nicht nur seine Wirtschaftsmacht als Waffe ein sondern die gesamte Bandbreite seiner Politik Wie vielfältig der chinesische Einfluss auch bei uns bereits ist enthüllen die beiden Autoren an zahlreichen Beispielen ein Anstoß zu einer dringend notwendigen Debatte Wie soll Deutschland wie Europa mit der neuen Weltmacht China umgehen Mit einem aktuellen Vorwort der Autoren

Currency Statecraft Benjamin J. Cohen, 2018-11-15 At any given time a limited number of national currencies are used as instruments of international commerce to settle foreign trade transactions or store value for investors and central banks How countries whose currencies gain international appeal choose to use this status forms their strategy of currency statecraft In different circumstances issuing governments may welcome and promote the

internationalization of their currency tolerate it or actively oppose it Benjamin J Cohen offers a provocative explanation of the strategic policy choices at play In a comprehensive review that ranges from World War II to the present Cohen convincingly argues that one goal stands out as the primary motivation for currency statecraft the extent of a country s geopolitical ambition or how driven it is to build or sustain a prominent place in the international community When a currency becomes internationalized it generally increases the power of the nation that produces it In the persistent contestation that characterizes global politics that extra edge can matter greatly making monetary rivalry an integral component of geopolitics Today the major example of monetary rivalry is the emerging confrontation between the US dollar and the Chinese renminbi Cohen describes how China has vigorously promoted the international standing of its currency in recent years even at the risk of exacerbating relations with the United States and explains how the outcome could play a major role in shaping the broader geopolitical engagement between the two superpowers

Money and Might Alessia Amighini, 2021-06-22T00:00:00+02:00 Launched by President Xi in 2013 the Belt and Road Initiative is at the heart of China s internationalization strategy In addition to the development of transportation infrastructure trade and communication it pursues financial cooperation with the rest of the world Indeed finance is the real lifeblood of the Initiative the most innovative and disruptive part in its operational institutional and political aspects Through a network of offshore financial centers scattered across the continents Chinese banks and stock exchanges are increasingly connected with foreign countries while remaining within a financial system protected by controls on international capital flows a regime of controlled exchange rate fluctuation and a publicly owned credit sector The network functions as a system of communicating vessels that pushes the circulation of the renminbi across borders and the people s currency becomes an instrument of reverse globalization it is not China that opens its financial sector to other countries but the latter that welcome a growing Chinese presence on international markets Along the BRI finance flows smoothly and with it the soft power by which China is setting a new course in globalization

The US-China Rift and Its Impact on Globalisation Raffaele Sciortino, 2024-02-12 Today globalisation has entered a critical phase of slowdown The asymmetrical US China relationship that has been the fundamental axis up to now has entered into crisis The financial imperialism of the dollar proves to be increasingly burdensome and destabilizing The rise of capitalist China is questioning US imperialist levy This book offers a comprehensive analysis of the looming confrontation while identifying potential points of no return in the intertwined dynamics of the world market geopolitical configurations and class relationships Neither contender can give up the game Will there be a de globalisation Is a multipolar order realistic Are we facing a Chinese hegemonic challenge or rather first signs that hint at the potential for systemic disintegration

Paper Dragons Walden Bello, 2019-08-15 Emerging relatively unscathed from the banking crisis of 2008 China has been viewed as a model of both rampant success and fiscal stability. But beneath the surface lies a network of fissures that look likely to erupt into the next big financial crash. A bloated real estate sector roller coaster stock market and rapidly growing shadow banking sector have all coalesced to create a perfect storm one that is in danger of taking the rest of the world's economy with it. Walden Bello traces our recent history of financial crises from the bursting of Japan's bubble economy in 1990 to Wall Street in 2008 taking in their political and human ramifications such as rising inequality and environmental degradation. He not only predicts that China might be the site of the next crash but that under neoliberalism this will simply keep happening. The only way that we can stop this cycle Bello argues is through a fundamental change in the ways that we organise a shift to cooperative enterprise respectful of the environment and which fractures the twin legacies of imperialism and capitalism. Insightful erudite and passionate **Paper Dragons** is a must read for anyone wishing to prevent the next financial meltdown

State, Capitalism, and Finance in Emerging Markets Johannes Petry, Andreas Nölke, 2025-06-24 What role do emerging markets play in the global financial system? In this edited volume leading scholars explore these questions focusing on state finance interactions globally. The book combines literatures on international financial subordination financial statecraft and comparative capitalism to analyse state finance relationships in emerging markets particularly the BRICS Brazil Russia India China and South Africa. reform era review the debate over whether the RMB is overvalued or undervalued present China's policies to globalize the RMB describe offshore RMB trading assess the current global status of the RMB and discuss geopolitical tensions in the last few years Since 2009 the process of globalizing RMB has not been smooth sailing and progressed quite unevenly over time Despite the strong performance in the early 2010s the RMB is under represented in the global market and its global role does not match China's economic might The path of RMB internationalization is affected by both China's economic performance and geopolitical factors **Handbook on China and Globalization** Huiyao Wang, Lu Miao, 2019 An excellent guide for understanding the trends challenges and opportunities facing China through globalization this Handbook answers the pertinent questions regarding the globalization process and China's influence on the world **Upstart** Oriana Skylar Mastro, 2024 Thirty years ago the idea that China could challenge the United States economically globally and militarily seemed unfathomable Yet today China is a superpower By showing how China pursued an upstart strategy rather than simply mimicking the US model Upstart How China became a Great Power powerfully demonstrates how China has been able to achieve great power status in such a short period of time and what it all means for the future of US China relations

China-us Trade Frictions Shaping New Equilibriums With The Eu And The Us: Towards A New Multilateralism Or Tripolarism Xugang Yu, Mario Tettamanti, Cristiano Rizzi, 2021-01-05 This book shows the impact of the recent trade tensions between China and the US on the world trade order and how parties have reached a deal so called phase one January 2020 which could lead to a more comprehensive agreement and the consequences of these adjustments in shaping new equilibriums After 40 years China has transformed into an economic superpower which could now rival the US This has evoked some concerns and put the US in an uncomfortable position as the US views the rise of China as a threat to its predominance and interests However China's development and its increasing economic power which is a direct consequence of the ongoing reform process is unstoppable The confrontation between China and the US will favor Chinese expansion into the EU not only because the EU offers a more receptive environment for Chinese Foreign Direct Investment but also because the EU and China have more in common if we consider the Belt And Road Initiative and the new bilateral investment agreement which is under negotiation The EU not only represents the final destination of the BRI but also a more logical and convenient trade partner for China The shift of Chinese attention toward the EU will also change the equilibrium between China the EU and the US bring forth the negotiation of new trade agreements and move the entire international community towards a new world trade order and a new multilateralism which might evolve into a tripolarism
