Le Corbusier Redrawn The Houses Book:

Le Corbusier Redrawn Steven Park, 2012-11-07 Le Corbusier 1887 1965 was the most significant architect of the twentieth century Every architecture student examines the Swiss master's work Yet all too frequently they rely on reproductions of faded drawings of uneven size and quality *Le Corbusier Redrawn* presents the only collection of consistently rendered original drawings at 1/200 scale of all twenty six of Le Corbusier's residential works Using the original drawings from the Le Corbusier Foundation's digital archives architect Steven Park has beautifully redrawn 130 perspectival sections as well as plans sections and elevations of exterior forms and interior spaces These remarkable new drawings which combine the conceptual clarity of the section with the spatial qualities of the perspective not only provide information about the buildings they also help students experience specific works spatially as they learn to critically examine Le Corbusier's works

The Fractal Dimension of Architecture Michael J. Ostwald, Josephine

Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century's most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world's most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design

Twenty Buildings Every Architect Should Understand Simon Unwin, 2010-02-25 Have you ever wondered how the ideas behind the world's greatest architectural designs came about What process does an architect go through to design buildings which become world renowned for their excellence This

book reveals the secrets behind these buildings He asks you to read the building and understand its starting point by analyzing its final form Through the gradual revelations made by an understanding of the thinking behind the form you learn a unique methodology which can be used every time you look at any building **AA Files** ,1983 *Le Corbusier, Paris - Chandigarh* Klaus-Peter Gast,2000 This analysis of the principles underlying Le Corbusier's work shows his work in an entirely new light enhanced by previously unpublished drawings and photographs *Privacy and Publicity* Beatriz Colomina,1996-02-28 Through a series of close readings of two major figures of the modern movement Adolf Loos and Le Corbusier Beatriz Colomina argues that architecture only becomes modern in its engagement with the mass media and that in so doing it radically displaces the traditional sense of space and subjectivity *Privacy and Publicity* boldly questions certain ideological assumptions underlying the received view of modern architecture and reconsiders the methodology of architectural criticism itself Where conventional criticism portrays modern architecture as a high artistic practice in opposition to mass culture Colomina sees the emerging systems of communication that have come to define twentieth century culture the mass media as the true site within which modern architecture was produced She considers architectural discourse as the intersection of a number of systems of representation such as drawings models photographs books films and advertisements This does not mean abandoning the architectural object the building but rather looking at it in a different way The building is understood here in the same way as all the media that frame it as a mechanism of representation in its own right With modernity the site of architectural production literally moved from the street into photographs films publications and exhibitions a displacement that presupposes a new sense of space one defined by images rather than walls This age of publicity corresponds to a transformation in the status of the private Colomina argues modernity is actually the publicity of the private Modern architecture renegotiates the traditional relationship between public and private in a way that profoundly alters the experience of space In a fascinating intellectual journey Colomina tracks this shift through the modern incarnations of the archive the city fashion war sexuality advertising the window and the museum finally concentrating on the domestic interior that constructs the modern subject it appears merely to house **A History of Housing in New York City** Richard Plunz,2016-10-18 Since its emergence in the mid nineteenth century as the nation's metropolis New York has faced the most challenging housing problems of any American city but it has also led the nation in innovation and reform The horrors of the tenement were perfected in New York at the same time that the very rich were building palaces along Fifth Avenue public housing for the poor originated in New York as did government subsidies for middle class housing A standard in the field since its publication in 1992 *A History of Housing in New York City* traces New York's housing development from 1850 to the present in text and profuse illustrations Richard Plunz explores the housing of all classes with comparative discussion of the development of types ranging from the single family house to the high rise apartment tower His analysis is placed within the context of the broader political and cultural development of New York City

This revised edition extends the scope of the book into the city's recent history adding three decades to the study covering the recent housing bubble crisis the rebound and gentrification of the five boroughs and the ecological issues facing the next generation of New Yorkers More than 300 illustrations are integrated throughout the text depicting housing plans neighborhood changes and city architecture over the past 130 years This new edition also features a foreword by the distinguished urban historian Kenneth T Jackson Archival practices and sites in the contemporary art field Beatrice von Bismarck, Hans-Peter Feldmann, Hans Ulrich Obrist, 2002 This book documents and extends the exhibition project Interarchiv of the Kunstraum der Universität Leineburg in co operation with Hans Peter Feldmann and Hans Ulrich Obrist 1997 2002

Colophon **Mediterranean Houses** Pascal Chossegros, Nicolas Borel, 1991 This series was the winner of the American Institute of Architects prestigious Award for Excellence in International Book Publishing Each volume in this series is introduced with an essay on the architect and a chronological or stylistic presentation of their most outstanding buildings and projects No other series provides such a complete and concise summary of the world's leading architects works The volumes are fully illustrated in black and white with photos and project renderings *Book Review Digest* , 1988 **The Architects' Journal** , 1996 *Journal* , 1991 **Towards Universality** Richard Padovan, 2002 A thorough examination of the work and philosophical foundations of Le Corbusier Mies van der Rohe and De Stijl considering how a study of one can illuminate the works of the others **Architecture** Henry-Russell Hitchcock, 1977 Amid the plethora of vernacular building done in this century and the last Professor Hitchcock was probably the only art historian equipped to chart the trends of the more conscious art of architecture He reveals here with a constant truth of perspective a period which is far more than a prelude to the age of steel and concrete Back cover *The Architect & Building News* , 1948
