Huss, 2025-03-18 FORENSIC INTERVIEWING IN CRIMINAL COURT MATTERS Marc Nesca, J. Thomas Dalby, 2013-06-01 Forensic mental health assessment has essentially become synonymous with forensic psychological assessment This necessary shift toward empirically grounded procedures has had the unfortunate by product of diminishing the importance of the clinical interview in favor of procedures biased in the direction of rigid structure and statistical formulas In contrast the authors approach to forensic mental health places the individual front and center in the assessment process The need to treat the interviewee as an individual rather than a member of some statistically defined group is the recurring theme of this book As much as possible the text is focused on the interview proper Issues related to the broader topic of forensic assessment are discussed as necessary to provide context Although the issues discussed apply equally in civil and family court settings the focus is on the criminal justice system This is not a how to book but rather focuses primarily on the interview process and on general areas of inquiry The text is organized into three sections 1 general issues 2 specific applications and 3 special populations Section 1 provides a conceptual foundation for the book by comparing and contrasting clinical and forensic interview strategies Further it introduces the concept of idiographic model construction central to the authors approach to interviewing and also addresses the thorny issues of malingering and response bias The section closes with a discussion of practical considerations and technical issues applicable to forensic interviews In section 2 the focus is narrowed to three criminal justice settings retrospective insanity offenses here and now adjudicative competency assessments and forward looking predisposition assessments The final section further narrows its focus with chapters on interviewing sexual violent and adolescent offenders as well as a chapter on third party sources of information in forensic mental health evaluations The book will serve as a valuable resource for a variety of mental health professionals as well as criminal justice administrators Familiarity and Conviction in the Criminal Justice System Joanna Pozzulo, Emily Pica, Chelsea Sheahan, 2019-11-01 Eyewitness research has focused mainly on stranger identification but identification is also critical for the familiar stranger and understanding how variability in an eyewitness s familiarity with the perpetrator may influence recall and recognition accuracy will facilitate swifter and more just resolutions to crime Familiarity and Conviction in the Criminal Justice System examines the notion of familiarity between an eyewitness victim and a perpetrator ranging from complete unfamiliarity as with a total stranger to a

very familiar other Authors Joanna Pozzulo Emily Pica and Chelsea Sheahan define what is meant by familiarity in an eyewitness context and how it has been operationalized and manipulated exploring factors that may interact with familiarity and examining jurors perceptions of it The first half of the book draws on various sub areas of psychology to understand familiarity against the backdrop of eyewitness identification social psychology theories of how familiarity is established cognitive psychology and its theories of recognition face processing literature and eyewitness literature. The second half of the book surveys system and estimator variables that influence identification such as lineup procedures interviewing techniques the role of age race and more as well as how familiarity is weighed in juror decision making A final chapter issues a call for continuing research examining the notion of familiarity and its impact on the criminal justice system **Psychology, Loose Leaf Version** Joanna Pozzulo, Craig Bennell, Adelle Forth, 2014-06-27 The Elderly Evewitness in **Court** Michael P. Toglia, David F. Ross, Joanna Pozzulo, Emily Pica, 2014-02-18 The majority of research on eyewitness memory has traditionally studied children and young adults By contrast this volume is designed to provide an overview of empirical research on the cognitive social and health related factors that impact the accuracy of eyewitness testimony given by the elderly The book takes a lifespan developmental perspective that incorporates research on witnesses of all ages but uses the findings to focus on issues unique to the elderly This includes research on recognition memory with lineup identifications and recall memory that occurs when an elderly witness is asked to describe an event in court The Elderly Eyewitness also examines jurors reactions to the testimony of an elderly witness and the legal and social policy issues that emerge when the elderly witness participate in legal proceedings While reviewing what is known about the elderly witness the book also provides a direction for future research into this new frontier of scientific inquiry Its audience spans researchers in cognitive and developmental psychology and professionals working in the growing area of psychology and law Social Research Methods H.
