Keene, 2016-02-24 Criminal and terrorist organisations are increasingly turning to white collar crime such as fraud e crime bribery data and identity theft in addition to more violent activities involving kidnap and ransom narcotics and arms trafficking to fund their activities and in some cases pursue their cause The choice of victims is global and indiscriminate The modus operandi is continually mutating and increasing in sophistication taking advantage of weaknesses in the system whether they be technological legal or political Countering these sources of threat finance is a shared challenge for governments the military NGOs financial institutions and other businesses that may be targeted Shima Keene's Threat Finance offers new thinking to equip any organisation regardless of sector and geographical location with the knowledge and tools to deploy effective counter measures to tackle the threat To that end she brings together a wide variety of perspectives cultural legal economic and technological to explain the sources mechanisms and key intervention methodologies The current environment continues to favour the criminal and the terrorist Threat Finance is an essential read for fraud and security practitioners financial regulators policy makers intelligence officials judges and barristers law enforcement officers and researchers in this field Dr Keene offers an antidote to the lack of good applied research shortcomings in in house financial and forensic expertise misdirected financial compliance schemes

**Accounting Curriculum in University Education** Alan Sangster, Richard M.S. Wilson, 2014-10-29 This book presents the views of accounting educators accounting education policy makers and accounting practitioners from across the world on the challenging topic of liberalising the accounting curriculum within university education Accounting is a relatively new subject within universities and has been absorbed into a high level of education without any real attempt to do so within the traditional ethos of a liberal arts education In this book the logic of teaching using the liberal arts is described and contrasted with the practical vocational training approach of teaching which has formed the foundation of accountancy courses for many years A proposal to change this established practice by integrating the liberal arts into the university accounting curriculum is followed by a series of short chapters which address the relevance validity and worthiness of the proposed approach Comments and counter arguments are then discussed before further chapters illustrate how the proposed change may be achieved in a variety of different contexts ranging from that of the global financial crisis which began in 2008 to the inclusion of ethics and sustainability within the accounting curriculum This book will aid those teaching accounting in universities to improve the design of their accounting degree programmes by moving away from an excessive emphasis on technical skills towards a broader consideration of a liberal contextualisation of the accounting curriculum This book was originally published as a special issue of Accounting Education an international journal *Congressional Record* United States.

Morduch, Rachel Schneider, 2017-03-27 What the financial diaries of working class families reveal about economic stresses why they happen and what policies might reduce them Deep within the American Dream lies the belief that hard work and steady saving will ensure a comfortable retirement and a better life for one's children But in a nation experiencing unprecedented prosperity even for many families who seem to be doing everything right this ideal is still out of reach In The Financial Diaries Jonathan Morduch and Rachel Schneider draw on the groundbreaking U S Financial Diaries which follow

the lives of 235 low and middle income families as they navigate through a year Through the Diaries Morduch and Schneider challenge popular assumptions about how Americans earn spend borrow and save and they identify the true causes of distress and inequality for many working Americans We meet real people ranging from a casino dealer to a street vendor to a tax preparer who open up their lives and illustrate a world of financial uncertainty in which even limited financial success requires imaginative and often costly coping strategies Morduch and Schneider detail what families are doing to help themselves and describe new policies and technologies that will improve stability for those who need it most Combining hard facts with personal stories The Financial Diaries presents an unparalleled inside look at the economic stresses of today s families and offers powerful fresh ideas for solving them **The Lumber Manufacturer and Dealer** ,1912
