This position will serve as great transition from junior to intermediate level for a young professional looking to further engineering skills in an array of projects as well as opportunity in management.

Roles and Responsibilities:

- Designing of mechanical, structural, and multi-disciplined systems, and equipment for industrial facilities with respect to requirements and scope on small to large projects
- Project Engineering – Client communication, scheduling, and progressing of projects
- Delegation and supervision of work to drafters to ensure project progression and delivery
- Detailed Design, and drafting from tender documents and drawings
- Developing deliverables packages along with drafting team – Project Plans, Scope documents, tenders, shop-drawings, engineering drawings
- Attend to other project deliverables and requirements as required
- Effective communication with project manager(s) and team members on all stages of a project to identify and address problems and bottlenecks
- Make site visits to facilities and construction sites as required for client meetings, site measurements, and inspections

Qualifications:

The following is a list of attributes of the ideal candidate:

- Bachelor or technologist degree in mechanical, or industrial engineering from an accredited Canadian institution
- Minimum 2 years practical project experience
- Strong working knowledge of interpreting and producing engineering drawings
- AutoCAD and Solid works experience considered a strong asset
- Comfortable with leading projects involving all engineering disciplines
