It is designed to give clinicians and other professionals targeted information to help them address vaccine hesitancy and antivaccination claims as well as ways of responding to immunisation concerns. Alongside the scientific facts around vaccinations, it considers the historical foundations of modern vaccine scepticism while offering key insights into the psychology behind vaccine hesitancy and the factors which influence an individual's decision making. Separating fact from fiction, the book explores the most well-known antivaccine myths, many of which proliferate online, uncovering ways that counter vaccine narratives can influence audiences. Importantly, it also outlines the most effective strategies to address both doubts and misinformation, detailing five general principles to improve communications with tips and guidance to debunk false claims or provide assurance in the face of immunisation doubts. This is essential reading for anyone wishing to really understand the phenomenon of vaccine hesitancy, whether professional student or general reader, and the methods that can be used to challenge misinformation.

Case Studies in Clinical Laboratory Science Linda Graves, 2002 This unique collection of 55 multidisciplinary case studies is designed to help laboratory technologists and technicians experience how departments work together to help the physician make a diagnosis and determine the best course of treatment for the patient. In working through the comprehensive real-world scenarios, readers deal firsthand with interpreting data from two, three, or four disciplines: Blood Bank, Chemistry, Hematology, Immunology, Microbiology, Urinalysis, integrating the facts, laboratory data from different departments, and thinking critically about what they mean. Includes 55 cases: 11 Blood Bank cases, 12 Chemistry cases, 10 Hematology Coagulation cases, 5 Immunology Serology cases, 10 Microbiology cases, 7 Urinalysis cases. Technicians and technologists who have been out of the field for awhile and are in the process of reentry into the profession, and technicians and technologists who are looking for a general review of clinical laboratory science.
