Office of Education,1951     **The Path to Equity** Bill Coplin,2023-07-03 Coplin has been saving students from the damage done by the bait and switch business model of the liberal arts programs for fifty years The bait promises career preparation and the switch is to teach undergraduates how to be scholars He demonstrates how the Kingdom of Liberals Arts programs are based on an elitist

attitude that is harmful to most undergraduates who value career preparation over love of learning This elitism leads to increased anxiety for college students and a college completion rate lower than the worst high schools in the U S He shows how the elitism does not serve equity and inclusion but does the opposite He demonstrates that the harm is not just confined to undergraduate education but to many socio economic conditions in American society The Kingdom has contributed to a K 12 education system that sends too many students to college and prevents the resources needed for careers without a college education It shares some of the blame for the lack of skill and semi skilled labor in this country Coplin ends on a positive note by showing that some progress in transforming the Kingdom to an institution that serves its undergraduates has occurred but much more needs to be done He suggests three most important structural changes need to quicken the pace of change and contribute to rather than prevent equity and inclusion

*STEM Education in US Prisons*, 2024-03-18 Renewal of higher education programs in US prisons creates a need for science education This is the first book to address STEM education in prisons in the United States It calls on activist science teachers to develop innovative ways to teach in challenging carceral settings Over the last fifty years science education and prison education have moved in different directions one expanding and the other contracting This book brings these educational endeavors into cooperative engagement Democratic citizenship opens opportunities for all people irrespective of civil status to study science The book presents student narratives and case studies emphasizing the achievements of STEM education behind prison walls STEM education equity can help address the deep social inequities that mass incarceration creates and magnifies Contributors are Cassandra Barrett Andrew Bell George Bogner Adrian Borealis Drew Bush Kelli Bush Sandy Chang Kelle Dhein Amalia Handler Steven Hart Steven Henderson Tiffany Hensley McBain Paul Kazelis Joe Lockard Edward Mei Tsafirir Mor Rob Scott Laura Taylor Joslyn Rose Trivett and Emily Webb

**Modern Educational Methods and Strategies in Teaching Mathematics** Yousef Methkal Abd Algani, Jamal Eshan, 2022-11-18 This book looks into the subject of classroom mathematics education It shows that students understanding and enthusiasm in mathematics grow as they progress through elementary school as do their thinking skills It defines the five building blocks of learning mathematics for primary school children as well as the motivational and affective determinants in elementary school mathematics The book also argues that mathematical aptitude is critical for a society s economic success as other professions such as engineering sciences social

sciences and even the arts require a strong grasp of the field Thus in secondary mathematics education the formation of identity as well as how students prefer to learn is stated The text includes an overview of curriculum design and the main components of curriculum development It shows that mathematics education and learning may be viewed as a progressive system and emphasizes the importance of student involvement in learning The Digital Classroom Ann S.

Michaelson,2020-12-29 The way students learn changes when they have access to digital tools The Digital Classroom demonstrates that using technology to enhance students learning is not dependent on a specific learning management system or software it is about changing the pedagogy with the help of an arsenal of useful tools and methods This practical book introduces easy to use methods to all teachers in digital classrooms with the intention to make it simple accessible and achievable for everyone It is not only about the tools and the how and why but also about changing the pedagogy making the learning more relevant to the students When you open the classroom to the rest of the world the teacher becomes more important than ever Topics in the book include Technology and deeper learning Social media in the global classroom Building a personal learning network The flipped classroom and cooperative learning The use of iPads in primary and middle school Teaching with videogames Special education Digital citizenship Digital tools can play a key role in making learning happen and what the teachers know about the use of technology is key The Digital Classroom will be of great interest to teachers and trainee teachers who wish to develop their digital competency by using the book as part of their professional learning
