Recovering the Soul G. Stephen Blakemore, 2023-01-19 Recovering the Soul explores an area of historical philosophy that few if any others have attempted by critically comparing the metaphysical doctrines of Thomas Aquinas and Baruch Spinoza on the identity of mind and body The central premise is that the hylomorphism of Aquinas s understanding of soul and body has a surprising affinity with Spinoza s own understanding of how human beings are enabled to exist as a single entity that is both mind and body In the process of making the case that hylomorphism can apply to Spinoza s philosophy as much as Aquinas s the book carefully exegetes the work of each philosopher and indicates how each is internally consistent within his own system of thought The hylomorphic reading of Spinoza helps to address some interpretive challenges that his commentators have noted and struggled to harmonize with other aspects of this monist ontology Beyond the historical and interpretive interests the book addresses it also makes the case that hylomorphism as a metaphysical theory of human constitution best harmonizes with contemporary studies in the human genome and provides a more comprehensive starting point for the philosophy of mind than reductionism or substance dualism

The Medicalized Body and Anesthetic Culture Brent Dean Robbins, 2018-04-03 This book examines how modern medicine s mechanistic conception of the body has become a defense mechanism to cope with death anxiety Robbins draws from research on the phenomenology of the body the history of cadaver dissection and empirical research in terror management theory to highlight how medical culture operates as an agent which promotes anesthetic consciousness as a habit of perception In short modern medicine s comportment toward the cadaver promotes the suppression of the memory of the person who donated their body This suppression of the memorial body comes at the price of concealing the lived experiential body of patients in medical practice Robbins argues that this style of coping has influenced Western culture and has helped to foster

maladaptive patterns of perception associated with experiential avoidance diminished empathy death denial and the dysregulation of emotion

Faith Physics Nathan V. Hoffman, 2021-03-15 FFaith Physics is a new Theory of Everything ToE combining ancient spiritual wisdom and modern quantum physics findings to deliver a belief system that is both intellectually sound and spiritually satisfying It maintains an ineffable Supreme Consciousness is the catalyst of all material creation as a great thought through pure white light in zero point morphogenetic quantum fields Faith Physics claims that consciousness is the cornerstone of base reality existing in a timeless state of now By using the natural cause and effect laws of classical physics the uncertainty principle of quantum mechanics and dark matter energy Faith Physics posits pure consciousness manifests physical creation in a remarkable myriad of forms In the wave particle duality paradigm revealed by quantum mechanics conscious observation transforms light energy into particulate physical matter as condensed or frozen light in accordance with Albert Einstein's famous $E=mc^2$ equation Faith Physics teaches us we exist and thrive in a unified participatory universe emanating from an eternal Supreme Consciousness source and we are not just a product of random chance evolution In the 21st century religion and science are reaching an enlightened consensus that pure metaphysical consciousness is perpetually painting a picture on the space time continuum canvas depicting a miraculous cycle of physical creation entropy and cosmic rebirth

World Religions and Cults Volume 3 Bodie Hodge, Roger Patterson, 2016-11-30 This final book in the series focuses on the atheistic or humanistic type of religions It would be one of the most valuable for the church in the Western World where anti god and pro evolution religions are beginning to explode for it was written to

refute those religions and show how they fail Unlike most books on world religions this title dives into the secular humanistic religions The book starts with God s Word as the absolute authority In doing so God becomes our guide to refute false religions Humanistic religions are all around us and we need to be able to spot their tenets and oppose them instead of allowing them to subtly infiltrate our Christianity and undermine us from within We need to know how to refute these humanistic religions We need to know how to effectively present the gospel to people who have been deceived by humanistic religions

The Time Warp Nat Steer, 2022-07-06 Consciousness is power whilst war and violence are the pedigree of the small minded With consciousness the depth of space can be contemplated and man can venture beyond his simplistic spatial concepts Understanding consciousness can recreate not only our brainwaves but also our ability to perceive God With a higher understanding of God and omniscience then mankind can conceive of new galaxies parallel universes and their matrix We can time warp

Candace Pert Pamela Ryckman, 2023-11-07 Candace Pert stood at the dawn of three revolutions the opioid crisis the AIDS crisis and the mind body movement Indeed her visionary work shaped history for good and inadvertently for evil Before there was Bessel van der Kolk there was Candace Pert the Mother of the Mind Body Revolution Her story forms a launchpad to discuss the most pressing issues plaguing science and healthcare today Pert played pivotal roles in major movements in both science and politics Namely she Discovered the opiate receptor the mechanism by which opioids function in the brain launching the opioid crisis Proved the mind body link launching the field of integrative or functional medicine Created Peptide T the underground AIDS drug featured in the film Dallas Buyers Club and then went rogue becoming a linchpin in the black market for her drug Pert was sabotaged by mentors and colleagues keen to profit from her brilliance But she too became tainted believing that her noble ends would justify devious means Like a mythic hero she succumbed to a fatal flaw and her greatest strengths singularity of purpose and blind faith in her own virtuosity would prove to be her undoing CANDACE PERT is a great read for anyone interested in integrative health mind body awareness medical ethics the bureaucracy of a toxic healthcare system and a flawed genius whose scandals and breakthroughs shaped history Exemplary research balanced accounts and deeply evocative prose a truly insightful narrative on what it can mean to be a woman at the cutting edge of science The Wall Street Journal Riveting biography nuanced portrait Readers will be engrossed Publisher s Weekly There is a revolution taking form that is significantly influencing how the Western medical community views health and disease Candace Pert s contribution to this revolution is undeniable Deepak Chopra Ryckman s writing is life like suspenseful and creates a roller coaster ride of stakes and unexpected discovery Dr Lisa Miller New York Times bestselling author of *The Spiritual Child* and *The Awakened Brain*

The Politics of Environmental Education Centres Anne Marie Ross, 2025-05-02 This book juxtaposes a representation of environmental education centres around the globe with centres within the New South Wales Department of Education in Australia As terminology shifted from nature study and conservation education to environmental education then environmental and sustainability education within sustainable

development the centres embodied and encompassed this evolution The book traces the centres journeys through the phenomenon of the 1970s growth in socially conscious governance to 1980s 1990s public managerialism to the tightening tentacles of capitalism The complexity of education as a socio political endeavour is made explicit Themes including the changing dynamics of caring for the environment and bureaucratic and political manoeuvring in addition to the effects of activism and globalisation are viewed through a centre lens as the centres survive and thrive in ever increasing neoliberal times The book will appeal to teachers academics and bureaucrats interested in the history and politics of environmental education *Indigenous People and the Christian Faith: A New Way Forward* William H. U. Anderson, Charles

Muskego, 2020-04-15 *Indigenous People and the Christian Faith A New Way Forward* provides detailed historical cultural and theological background and analysis to a very delicate and pressing subject facing many people around the world The book is glocal both local and global as represented by international scholars Every continent is represented by both Indigenous and non indigenous people who desire to make a difference with the delicate problematics and relationships The history of Indigenous people around the world is inextricably linked with Christianity and Colonialism The book is completely interdisciplinary by employing historians literary critics biblical scholars and theologians sociologists philosophers and ordained engineers The Literary Intent of the book without presuming nor claiming too much for itself is to provide practical thinking that will help all people move past the pain and dysfunction of the past toward mutual understanding communication and practical actions in the present and future *Brain Art and Neuroscience* David Gruber, 2020-05-05 The first of its kind this book examines artistic representations of the brain after the rise of the contemporary neurosciences examining the interplay of art and science and tackling some of the critical cultural implications Weaving an MRI pattern onto a family quilt Scanning the brain of a philosopher contemplating her own death and hanging it in a museum Is this art or science or something in between What does it mean How might we respond In this ground breaking new book David R Gruber explores the seductive and influential position of the neurosciences amid a growing interest in affect and materiality as manifest in artistic representations of the human brain Contributing to debates surrounding the value and or purpose of interdisciplinary engagement happening in the neuro humanities Gruber emphasizes the need for critical cultural analysis within the field Engaging with New Materialism and Affect Theory the book provides a current and concrete example of the on going shift away from constructivist lenses arguing that the influence of relatively new neuroscience methods EEG MRI and fMRI on the visual arts has not yet been fully realised In fact the very idea of a brain as it is seen and encountered today or The Brain as Gruber calls it remains in need of critical wild and rebellious re imagination Illuminating how artistic engagement with the brain is often sensual and suggestive even if rooted in objectivist impulses and tied to scientific realism this book is ideal for scholars in Art Media Studies Sociology and English departments as well visual artists and anyone seriously engaging discourses of the brain **The Theatre of Nuclear Science** Jeanne Tiehen, 2021-11-28 The Theatre of

Nuclear Science theoretically explores theatrical representations of nuclear science to reconsider a science that can have consequences beyond imagination Focusing on a series of nuclear science plays that span the twentieth and twenty first centuries and including performances of nuclear science in museums film and media Jeanne Tiehen argues why theatre and its unique qualities can offer important perspectives on this imperative topic This book will be of great interest to students and scholars of theatre politics and literature The Human Being, the World and God Anne L.C. Runehov,2016-09-26 This book offers a philosophical analysis of what it is to be a human being in all her aspects It analyses what is meant by the self and the I and how this feeling of a self or an I is connected to the brain It studies specific cases of brain disorders based on the idea that in order to understand the common one has to study the specific The book shows how the self is thought of as a three fold emergent self comprising a relationship between an objective neural segment a subjective neural segment and a subjective transcendent segment It explains that the self in the world tackles philosophical problems such as the problem of free will the problem of evil the problem of human uniqueness and empathy It demonstrates how the problem of time also has its place here For many people the world includes ultimate reality hence the book provides an analysis and evaluation of different relationships between human beings and Ultimate Reality God The book presents an answer to the philosophical problem of how one could understand divine action in the world Speaking Management Stephen Keith McGrath,2022-01-05 This book identifies ten linguistic traps in our everyday language usage and provides philosophical justification for a method of determining internally consistent definitions of groups of related terms that avoid all ten traps Various examples and applications of this method are given throughout The book demonstrates how the seemingly straightforward matter of our understandings of the meaning of words can have major implications for the exercise of power This book illustrates how this insight originated from management research into project governance that found lack of agreement on the definition of that term as well as on many other important management terms To resolve this the impacts of evolution philosophy and linguistics upon our everyday language usage were investigated The research documented in this book found that the human tool called language works well for describing physical objects but has difficulty producing a common understanding of the meaning of concepts a problem not restricted to the management field That field is simply a microcosm that exposes a much more widespread linguistic usage problem affecting our personal religious and political lives one that existed at the time of Plato and Aristotle and has laid hidden for millennia This book includes a lexicon of 70 commonly used but confused or contested management terms as well as a further 18 such project management terms all developed by applying its definitional method The terms include governance power ethics leadership and their associated groups of terms The book explores how disagreement can be resolved using these new clear definitions and extends this into an analysis of who good ethics are good for It also incorporates a section on how to speak management and actually know what you are talking about written in the style of an idiots guide or guide for dummies This identifies common everyday

circumstances in which lack of agreed definitions cause avoidable confusion and provides the book's focus on conflict dissolution rather than on conflict resolution *Reinventing Knowledge: From Alexandria to the Internet* Ian F. McNeely, Lisa Wolverton, 2009-09-08 History *The Humanistic Person-centered Company* Domènec Melé, 2024-04-26
