Design And Verification Of Axi Ocp Bridge Supporting Out:

Proceedings of the 5th International Conference on Frontiers in Intelligent Computing: Theory and Applications Suresh Chandra Satapathy, Vikrant Bhateja, Siba K. Udgata, Prasant Kumar Pattanaik, 2017-03-02 The book is a collection of high quality peer reviewed research papers presented at International Conference on Frontiers of Intelligent Computing Theory and applications FICTA 2016 held at School of Computer Engineering KIIT University Bhubaneswar India during 16 17 September 2016 The book aims to present theories methodologies new ideas experiences applications in all areas of intelligent computing and its applications to various engineering disciplines like computer science electronics electrical mechanical engineering etc

Reconfigurable Computing: Architectures, Tools, and Applications Diana Goehringer, Marco Domenico Santambrogio, João M.P. Cardoso, Koen Bertels, 2014-04-09 This book constitutes the thoroughly refereed conference proceedings of the 10th International Symposium on Reconfigurable Computing Architectures Tools and Applications ARC 2014 held in Vilamoura Portugal in April 2014 The 16 revised full papers presented together with 17 short papers and 6 special session papers were carefully reviewed and selected from 57 submissions The topics covered are applications methods frameworks and OS for debug over clocking and relocation memory architectures methodologies and tools and architectures

Advances in Communication, Devices and Networking Rabindranath Bera, Subir Kumar Sarkar, Om Prakash Singh, Hemanta Saikia, 2019-02-15 The book covers recent trends in the field of devices wireless communication and networking It presents the outcomes of the International Conference in Communication Devices and Networking ICCDN 2018 which was organized by the Department of Electronics and Communication Engineering Sikkim Manipal Institute of Technology Sikkim India on 2 3 June 2018 Gathering cutting edge research papers prepared by researchers engineers and industry professionals it will help young and experienced scientists and developers alike to explore new perspectives and offer them inspirations on addressing real world problems in the field of electronics communication devices and networking

Communication Architectures for Systems-on-Chip José L. Ayala, 2018-09-03 A presentation of state of the art approaches from an industrial applications perspective Communication Architectures for Systems on Chip shows professionals researchers and students how to attack the problem of data communication in the manufacture of SoC architectures With its lucid illustration of current trends and research improving the performance quality and reliability of transactions this is an essential reference for anyone dealing with communication mechanisms for embedded systems systems on chip and multiprocessor architectures or trying to overcome existing limitations Exploring architectures currently implemented in manufactured SoCs and those being proposed this book analyzes a wide range of applications including Well established communication buses Less common networks on chip Modern technologies that include the use of carbon nanotubes CNTs Optical links used to speed up data transfer and boost both security and quality of service QoS The book s contributors pay special attention to newer problems including how to protect transactions of critical

on chip information personal data security keys etc from an external attack They examine mechanisms revise communication protocols involved and analyze overall impact on system performance

Embedded Systems Handbook 2-Volume Set
Richard Zurawski, 2018-10-08 During the past few years there has been an dramatic upsurge in research and development implementations of new technologies and deployments of actual solutions and technologies in the diverse application areas of embedded systems These areas include automotive electronics industrial automated systems and building automation and control Comprising 48 chapters and the contributions of 74 leading experts from industry and academia the Embedded Systems Handbook Second Edition presents a comprehensive view of embedded systems their design verification networking and applications The contributors directly involved in the creation and evolution of the ideas and technologies presented offer tutorials research surveys and technology overviews exploring new developments deployments and trends To accommodate the tremendous growth in the field the handbook is now divided into two volumes New in This Edition

Processors for embedded systems Processor centric architecture description languages Networked embedded systems in the automotive and industrial automation fields Wireless embedded systems Embedded Systems Design and Verification Volume I of the handbook is divided into three sections It begins with a brief introduction to embedded systems design and verification The book then provides a comprehensive overview of embedded processors and various aspects of system on chip and FPGA as well as solutions to design challenges The final section explores power aware embedded computing design issues specific to secure embedded systems and web services for embedded devices Networked Embedded Systems Volume II focuses on selected application areas of networked embedded systems It covers automotive field industrial automation building automation and wireless sensor networks This volume highlights implementations in fast evolving areas which have not received proper coverage in other publications Reflecting the unique functional requirements of different application areas the contributors discuss inter node communication aspects in the context of specific applications of networked embedded systems

Design and Verification of Bus Bridge from Ocp to Ahb Ranganathan Sundaram, 2012 Protocols are commonly used to connect IP blocks on structured SoCs Generally Protocol is the back bone of the SoC and its failure usually leads to a non functional chip In present market various types of standard protocols are available and are used in SoC which requires a bridge to pass the information from one type of protocol to other type of protocol safely and without any data loss OCP and AMBA AHB protocol are commonly used protocols In this work the bus bridge has been designed to interface these protocols which plays a vital role in SoC application such as it may lead to application failure if it doesn t work properly Initially OCP and AHB protocols are modeled separately using VHDL and are simulated Basically Bus Bridge should convert command and data of OCP formats to acceptable AHB formats This conversion does not ensure proper communication unless the timings of each protocol were met Hence the interconnecting Bus Bridge wrapper between Core Centric Protocol OCP and Bus Centric Protocol AHB was designed with proper timing delay Also the PSL assertions are written in order to verify

the behavior of protocols
