*Synthetic Data and Generative AI* Vincent Granville, 2024-01-09. *Synthetic Data and Generative AI* covers the foundations of machine learning with modern approaches to solving complex problems and the systematic generation and use of synthetic data. Emphasis is on scalability, automation, testing, optimizing and interpretability, explainable AI. For instance, regression techniques including logistic and Lasso are presented as a single method without using advanced linear algebra. Confidence regions and prediction intervals are built using parametric bootstrap without statistical models or probability distributions. Models including generative models and mixtures are mostly used to create rich synthetic data to test and benchmark various methods. Emphasizes numerical stability and performance of algorithms, computational complexity. Focuses on explainable AI, interpretable machine learning with heavy use of synthetic data and generative models, a new trend in the field. Includes new, easier construction of confidence regions without statistics, a simple alternative to the powerful well-known XGBoost technique. Covers automation of data cleaning, favoring easier solutions when possible. Includes chapters dedicated fully to synthetic data applications: fractal-like terrain generation with the diamond square algorithm and synthetic star clusters evolving over time and bound by gravity.

Verhoef,Edwin Kooge,Natasha Walk,2016-01-08 Our newly digital world is generating an almost unimaginable amount of data about all of us Such a vast amount of data is useless without plans and strategies that are designed to cope with its size and complexity and which enable organisations to leverage the information to create value This book is a refreshingly practical yet theoretically sound roadmap to leveraging big data and analytics Creating Value with Big Data Analytics provides a nuanced view of big data development arguing that big data in itself is not a revolution but an evolution of the increasing availability of data that has been observed in recent times Building on the authors extensive academic and practical knowledge this book aims to provide managers and analysts with strategic directions and practical analytical solutions on how to create value from existing and new big data By tying data and analytics to specific goals and processes for implementation this is a much needed book that will be essential reading for students and specialists of data analytics marketing research and customer relationship management Creating Value with Data Analytics in Marketing Peter C. Verhoef,Edwin Kooge,Natasha Walk,Jaap E. Wieringa,2021-11-07 This book is a refreshingly practical yet theoretically sound roadmap to leveraging data analytics and data science The vast amount of data generated about us and our world is useless without plans and strategies that are designed to cope with its size and complexity and which enable organizations to leverage the information to create value in marketing Creating Value with Data Analytics in Marketing provides a nuanced view of big data developments and data science arguing that big data is not a revolution but an evolution of the increasing availability of data that has been observed in recent times Building on the authors extensive academic and practical knowledge this book aims to provide managers and analysts with strategic directions and practical analytical solutions on how to create value from existing and new big data The second edition of this bestselling text has been fully updated in line with developments in the field and includes a selection of new international cases and examples exercises techniques and methodologies Tying data and analytics to specific goals and processes for implementation makes this essential reading for advanced undergraduate and postgraduate students and specialists of data analytics marketing research marketing management and customer relationship management Online resources include chapter by chapter lecture slides and data sets and corresponding R code for selected chapters The Digital Transformation of Labor Anthony Larsson,Robin Teigland,2019-11-11 Through a series of studies the overarching aim of this book is to investigate if and how

the digitalization digital transformation process causes or may cause the autonomy of various labor functions and its impact in creating or stymieing various job opportunities on the labor market This book also seeks to illuminate what actors groups are mostly benefited by the digitalization digital transformation and which actors groups that are put at risk by it This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous as on the one hand it is suggested that technological change is labor saving but on the other hand it is suggested that digital technologies have not created new jobs on a scale that it replaces old jobs Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future although tasks would by and large change significantly This would affects welfare as most of its revenue stems from taxation and particularly so from the taxation on labor directly or indirectly For this reason this book will set out to explore how the future technological and societal advancements impact labor conditions The book seeks to provide an innovative enriching and controversial take on how various aspects of the labor market can be and are affected the ongoing digitalization trend in a way that is not covered by extant literature As such this book intends to cater to a wider readership from a general audience and students to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization digital transformation of society at large
