Getting Ready for Benjamin Rita M. Kissen, 2002-10-23 This book argues that issues of sexual diversity are inextricably interwoven into the basic concerns of pre service teacher education How do we make our students aware of assumptions regarding masculinity femininity and sexuality that arise from what is presented represented or omitted from curricula and classroom practice What do we say about homophobia and heterosexism as we anticipate the administrative hierarchies school cultures parent and community politics they will encounter as teachers What special challenges might face a teacher straight or gay who discusses sexual orientation in a high school classroom or responds to a homophobic remark in the hallway or the cafeteria How should we prepare a teacher for a parent conference with two moms or two dads The essays in this volume range from an analysis of gay stereotypes in teacher education textbooks to a discussion of queer multiculturalism to personal accounts by lesbian and gay teacher educators and heterosexual allies who are challenging homophobia and heterosexism in their own classrooms and programs All agree that education for sexual diversity is as important as education about all other forms of difference and that future teachers need to know how to create safe spaces for lesbian and gay students along with the children of gay families who are increasingly a part of the classroom landscape

Understanding

Human Development Ursula M. Staudinger, Ulman E.R. Lindenberger, 2012-12-06 K Warner Schaie I am pleased to write a foreword for this interesting volume, particularly as over many years I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague, mentor, or research collaborator. The editors begin their introduction by asking why one would want to read yet another book on human development. They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so

essential to understanding development This volume provides a positive remedy to past deficiencies in volumes on human development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure This approach does not surprise After all the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin whether as students junior scientists or senior visitors That institute under the leadership of Paul Baltes has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality Over the past two decades it has influenced the careers of a generation of scientists who have advocated long term studies of human development in an interdisciplinary context

Lerner,1999-08-24 This volume presents the reader with a stimulating rich tapestry of essays exploring the nature of action and intentionality and discussing their role in human development As the contributions make clear action is an integrative concept that forms the bridge between our psychological biological and sociocultural worlds Action is also integrative in the sense of entailing motivational emotional and cognitive systems and this

integration too is well represented in the chapters Action is defined and distinguished from behavior according to its intentional quality Thus a constantly recurring theme in the volume involves the dialectic of action intentionality and specifically the questions of how and when these concepts are to be distinguished For action theorists action as distinguished from behavior constitutes the fundamental mechanism of human development This commitment is detailed in several essays that explore the life span implications of action This timely volume will be must reading for all who want to learn about or stay current with contemporary action theoretical approaches to human development Willis F Overton Temple University The present volume advances the view that we cannot go far in understanding development over the life span without paying heed to self reflective processes In a reciprocal way self reflection links developmental change in the ways in which the person constructs his or her own development over the life span Development action and intentionality exist then in an intimate relationship As development forms the social and historical settings within which intentional activity is embedded thus become indispensable categories for developmental theory and research Due to their potential to integrate culture history and personality action theoretical concepts have made strong inroads in many areas of social and behavioral research Within the field of developmental psychology researchers have come to recognize that developmental patterns and their variation across historical and social contexts cannot easily be reduced to invariant laws Instead they reflect the agency of both the culture and the person Issues of intentional self development gain particular importance within the developmental settings of modernity Under conditions of cultural acceleration globalization and pluralization of life forms normative scripts and timetables of development have become blurred and people are increasingly forced to take a playful self monitoring and optimizing stance toward their own behavior and development As will become evident throughout this ground breaking book an action perspective on development covers a broad spectrum of theoretical approaches Concepts such as personal goals personal projects life themes meaning life planning compensation or intentional self development have become the nuclei of innovative research programs The chapters collected in this volume by scholars on the forefront of action theory and research provide an indication of the promise that these notions hold for life span developmental psychology motivation research and research on aging
