Competition Law in Developing Countries

Thomas K. Cheng,2020-05-27 This book brings together perspectives of development economics and law to tackle the relationship between competition law enforcement and economic development It addresses the question of whether and how competition law enforcement helps to promote economic growth and development This question is highly pertinent for developing countries largely because many developing countries have only adopted competition law in recent years about thirty jurisdictions had in place a competition law in the early 1980s and there are now more than 130 competition law regimes across the world of which many are developing countries The book proposes a customized approach to competition law enforcement for developing countries set against the background of the academic and policy debate concerning convergence of competition law The implicit premise of convergence is that there may exist one or a few correct approaches to competition law enforcement which in most cases emanate from developed jurisdictions that are applicable to all This book rejects this assumption and argues that developing countries ought to tailor competition law enforcement to their own economic and political circumstances In particular it suggests how competition law enforcement can better incorporate development concerns without causing undue dilution of its traditional focus on protecting consumer welfare It proposes ways in which approaches to competition law enforcement need to be adjusted to reflect the special economic characteristics of developing country economies and the more limited enforcement capacity of developing country

competition authorities Finally it also addresses the long running debate concerning the desirability and viability of industrial policy for developing countries The author would like to acknowledge the Research Grants Council of Hong Kong for its generous support The work in this book was fully supported by a grant from the Research Grants Council of Hong Kong Project No HKU 742412H **Strategic Asia 2011-12: Asia Responds to Its Rising Powers** M. Taylor Fravel, 2011

Sun, 2021-07-08 The book provides a meticulous analysis of economic development and concomitant problems in China since the late 1970s and advances suggestions on further economic modernisation and transition from both theoretical and practical angles Based on theories from development economics and solid empirical studies the authors two renowned Chinese economists provide a perceptive analysis of the Chinese development model in the post Mao era They shed light on questions that have perplexed many How can China sustain the rapid growth of the past 40 years Is there a unique China path to economic progress They argue compellingly that China s development model has to switch from a manufacturing driven one to a brand new approach centring on scientific and technical innovation and the integration of its existing economic structure into an increasingly complex global economy Such transformation will help overcome the middle income trap while addressing other institutional and economic challenges The book will appeal to students scholars and policymakers interested in the Chinese and global economies as well as transnational studies in the post COVID 19 world General readers willing to obtain a grasp of Chinese economic development from the insider s perspective will also find it useful **Ebook: International Economics** Appleyard ; Fie, 2016-09-16 Ebook International Economics Principles of

Red Swan Sebastian Heilmann, 2018-07-15 The resilience of the Communist party state in combination with a rapidly expanding economy represents a significant deviant case for the debate about models of development This book focuses on the manner in which China's governmental system can be developed formulated implemented adjusted and revised Policy making is seen as an open ended process with an uncertain outcome driven by conflicting interests recurrent interactions and continuous feedback rather than determined by history regime type or institutions Key to this are the capacity to deal with both existing and emerging challenges correction mechanisms when conflicts arise and adaptive capabilities in a changing economic or international context
