Dictionary Of Geography:

A Dictionary of Geography, Second Edition F. J. Monkhouse, 2008 The geographer seeks to describe the diverse features of the earth's surface to explain if possible how these features have come to be what they are and to discuss how they influence the distribution of man with his diverse activities Geography therefore stands transitionally yet centrally between the natural sciences the social studies and the humanities While in its concept and content it is an integrated whole of necessity it impinges on the associated disciplines and inevitably makes use of a wide range of kindred terminology In compiling the 3 400 entries for this dictionary the main criterion for inclusion has been usage Geographical textbooks and periodicals have been systematically combed and where a term has been used in a specific geographical context or in a specialist sense which differs from general practice or popular usage it has been included Foreign words are listed where they have been accepted into English geographical literature especially where no satisfactory translation exists Cross references are freely given printed in small capitals where it is necessary to assist the user in tracing cognate and supplementary entries or where the meaning of the word thus shown is essential to the understanding of the entry The emphasis throughout is on specific factual information conveniently accessible on a strict alphabetical basis rather than a bare definition Statistical material and formulae are appended where it would seem helpful in the form of tables under the relevant entries Since this dictionary is neither a gazetteer nor a compendium of current affairs lists of countries and capitals regional names and international groupings are not included since these can be found conveniently elsewhere The five hundred and seventy two additional entries to this dictionary together with a few minor modifications to the existing material are the result of extensive correspondence and discussion since the appearance of the first edition This edition originally published in 1970 has continuing relevance as a resource for professionals F J Monkhouse was formerly chair of geography at the University of Southampton Throughout his career he was also visiting professor at the University of Illinois University of Maryland Queen's University and the Miami University Ohio His books include *The Countries of North Western Europe* and *The Lake District*

A Dictionary of Geography Wilfred George Moore, 1974 [A Dictionary of Human Geography](#) Noel Castree, Rob Kitchin, Alisdair Rogers, 2013-04-25 This new dictionary provides over 2 000 clear and concise entries on human geography covering basic terms and concepts as well as biographies organisations and major periods and schools Authoritative and accessible this is a must have for every student of human geography as well as for professionals and interested members of the public

Dictionary of Geography, [The Dictionary of Physical Geography](#) David S. G. Thomas, Andrew S. Goudie, 2009-07-17 The third edition of this comprehensive encyclopedic dictionary covers the whole field of physical geography and provides an essential reference for all students and lecturers in this field

Elsevier's Dictionary of Geography Vladimir Mikhaïlovich Kotliakov, Anna Igorevna Komarova, 2007 Geography is a system of highly developed sciences about the environment Geographical science embracing the study of the Earth's physical phenomena

people and their economic activities has always been in need of an extensive terminology. Geographical terms are related to the terms of natural sciences: physics, chemistry, biology, geology, etc. and humanities: history, economics, sociology, etc. since geography is based on these fundamental subjects. Geography includes a number of disciplines and subdivisions which appeared along with the development of the science. In spite of being very different, geographical disciplines have some common tools of investigation which are: maps, comparative method, exploration, remote sensing, geoinformation systems. Today very well developed terminologies of all the specialist fields of geography and related subjects exist in the main world languages. However, they are not always well correlated. Nowadays geographical terminology requires unification and international correlation more than ever before. Hence the idea of compiling a multilingual polydisciplinary dictionary. The Dictionary consists of the basic table of terms arranged according to the order of the English alphabet with each term numbered. Each entry consists of the term in English and its equivalents in Russian, French, German, Spanish. Short definitions of terms are given in English and in Russian. The terms are supplied with the necessary grammar labels such as gender of nouns, plural number, etc. The Dictionary combines two functions: that of a defining dictionary and that of a bilingual dictionary. These two functions are basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one, while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum possible translations differing in the shades of meanings, thus giving him the possibility to choose the appropriate word. But in our Dictionary we intentionally decided to combine the two functions: defining and multilingual, because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages. Having this into consideration, we deliberately mixed two types of dictionaries in one. Organized alphabetically via English. Provides short definition of geographical terms in English and Russian. Includes multilingual translation of terms from English to Russian, French, German, Spanish.

A Dictionary of Geography, ancient and modern, etc. Josiah CONDER (Editor of "The Patriot."), 1834

A Dictionary of Geography F. J. Monkhouse, 2017-07-12. The geographer seeks to describe the diverse features of the earth's surface to explain, if possible, how these features have come to be what they are and to discuss how they influence the distribution of man with his diverse activities. Geography therefore stands transitionally yet centrally between the natural sciences, the social studies, and the humanities. While in its concept and content it is an integrated whole, of necessity it impinges on the associated disciplines and inevitably makes use of a wide range of kindred terminology. In compiling the 3 400 entries for this dictionary, the main criterion for inclusion has been usage. Geographical textbooks and periodicals have been systematically combed and where a term has been used in a specific geographical context or in a specialist sense which differs from general practice or popular usage, it has been included. Foreign words are listed where they have been accepted into English geographical literature, especially where no satisfactory translation exists. Cross

references are freely given printed in small capitals where it is necessary to assist the user in tracing cognate and supplementary entries or where the meaning of the word thus shown is essential to the understanding of the entry The emphasis throughout is on specific factual information conveniently accessible on a strict alphabetical basis rather than a bare definition Statistical material and formulae are appended where it would seem helpful in the form of tables under the relevant entries Since this dictionary is neither a gazetteer nor a compendium of current affairs lists of countries and capitals regional names and international groupings are not included since these can be found conveniently elsewhere The five hundred and seventy two additional entries to this dictionary together with a few minor modifications to the existing material are the result of extensive correspondence and discussion since the appearance of the first

A Dictionary of Geography F. J. Monkhouse, 1965 **A General Dictionary of Geography, Descriptive, Physical, Statistical, Historical, Forming a Complete Gazetteer of the World** Alexander Keith Johnston, 1877 *Dictionary of Geography, Descriptive, Physical, Statistical, and Historical, Forming a Complete General Gazetteer of the World* Alexander Keith Johnston, 1862 **The Penguin Dictionary of Geography** Wilfred George Moore, 1988 *Dictionary of Geography* Malcolm Skinner, David Redfern, Geoff Farmer, 2013-10-31

Geography as a subject covers a very wide range of topics and the concepts are constantly being updated and revised Dictionary of Geography designed to aid understanding of a sometimes complex field is an A Z guide to key geographical terms Each entry begins with a clear one sentence definition and is then developed in line with the relative importance of the concept covered often through the use of worked examples and illustrations Entries are carefully cross referenced

Encyclopaedic Dictionary of Geography M.S. Rao, 2004-08 *A Modern Dictionary of Geography* John Small, 1989 **A dictionary, geographical, statistical, and historical, of the various countries, places, and principal natural objects in the world** John Ramsay M'Culloch, 1852 *A General Dictionary of Geography, Descriptive, Physical, Statistical, Historical, Forming a Complete Gazetteer of the World, by A. Keith Johnston,... New Edition, Thoroughly Revised. [By J. H. Lamprey.].* Alexander Keith Johnston (l'aîné.), 1877 **Four Centuries of Special Geography** O.F.G. Sitwell, 2011-11-01

Geography as an academic discipline dates back to the last few decades of the nineteenth century However during the preceding centuries a large body of English language literature relevant to the field of special geography was published Four Centuries of Special Geography lists all the works published before 1888 and includes descriptions of each entry and notes on later editions Francis Sitwell has written an extensive introduction in which he provides a detailed guide to the organization and contents of the bibliography He also evaluates special geography as a genre which contributed to scholarly discourse from the sixteenth to the nineteenth centuries In addition he examines the genre as a whole and discusses its relation to the evolving world of ideas during the same time period The result of several years of data gathering this book will be a valuable research tool for anyone seeking to examine aspects of the development of the field of geography in the years before it was defined as a distinct academic discipline It will also be useful to those whose research focuses on

the acquisition and transmission of geographical knowledge prior to the twentieth century in particular on the place of geography in educational curricula *A Dictionary, Geographical, Statistical, and Historical, of the Various Countries, Places, and Principal Natural Objects in the World* John Ramsay McCulloch, 1847 Dictionary of Human Geography Derek Gregory, 1981
