Roth,Lizy K. John,2008 This textbook is intended for a senior level course in digital systems design The book covers both basic principles of digital systems design and the use of a hardware description language VHDL in the design process   **Designing for Digital Transformation. Co-Creating Services with Citizens and Industry** Sara Hofmann,Oliver Müller,Matti Rossi,2020-12-01 This book constitutes the thoroughly refereed proceedings of the 15th International Conference on Design Science Research in Information Systems

and Technology DESRIST 2020 held in Kristiansand Norway in December 2020 The 28 revised full research papers included in the volume together with 7 research in progress papers and 9 prototype papers were carefully reviewed and selected from 93 submissions They are organized in the following topical sections digital public services data science design principles methodology platforms and networks and service science Due to the Corona pandemic this event was held virtually *Books in Print* ,1994 **Optimizing Digital Solutions for Hyper-Personalization in Tourism and Hospitality** Gustavo, Nuno,Pronto, João,Carvalho, Luísa,Belo, Miguel,2022-02-19 As hyper personalization has yet to be perfected developing hyper personalized strategies presents a critical challenge due to this optimizing hyper personalization and designing new processes and business models takes center stage in tourism and hospitality to reach new levels of customer service and experience through the introduction and development of new solutions supported in the internet of things software interfaces artificial intelligence solutions back end and front end management tools and other emergent business intelligence strategies Optimizing Digital Solutions for Hyper Personalization in Tourism and Hospitality serves as an essential reference source that emphasizes the importance of hyper personalization models processes strategies and issues within tourism and hospitality fields with a particular focus on digital IT solutions More than a simple starting point for a critical reflection on the state of the art of this sector this book aims to contribute in an objective way to leveraging digital solutions to optimize the concept of hyper personalization in the tourist experience The content of this book covers research topics that include digital tourism and hospitality consumer behavior customer journey and smart technologies and is ideal for professionals executives hotel managers event coordinators restaurateurs travel agents tour directors policymakers government officials industry professionals researchers students and academicians in the fields of tourism and hospitality management marketing and communications Water Scarcity: Risks and Solutions Müfit Bahadir,2018-07-31 The progressive developments of all sectors and the present water policy in the MENA countries have resulted in a difficult water shortage In fact one of the most critical challenges nowadays is the drastically decreasing water availability per capita in most of the MENA States Cities industries agriculture and the environment are seriously impaired Several cities in the MENA region have literally run out of water recently resulting in major havoc and costs for citizens business and government Water scarcity and droughts severely affect local communities and disrupt supply chains through disseminating agricultural production and limiting industrial production Scarcity is expected to intensify with most forms of economic development and as a result of extreme variability in climate If unmitigated extreme droughts will have an aggravating impact on economies societies and the environment in the MENA region and in all parts of the world To cope with the water scarcity situation water use efficiency across all sectors should be substantially increased and sustainable withdrawals should be ensured Moreover exploitation of non conventional water supplies is regarded being a valuable option for all countries despite their sharply contrasting water situation In addition water pollution issues are of high priority and crucial to address to stakeholders in terms of environment health and

agriculture and involving them into related R D projects Involving higher education sector through universities is to guarantee analyzing the problems and investigating new approaches while transferring knowledge and practical skills
