Are We There Yet? Martin Stewart-Weeks,Simon Cooper,2019-07-01 Digital

transformation across the public sector has stalled After over 25 years of considerable time money and effort at national state and local levels we re still not there yet The reason is that successive waves of investment in digital transformation have focused largely on improving the transactional functions and activities of government They have failed to embrace a bigger challenge the need for governing and government to rethink a new theory of the business which that same revolution has caused and to which it is an inescapable part of the answer This is a unique timely and distinctly Australian look at a global phenomenon by two reflective practitioners Their personal and practical experience of digital transformation in government and the public sector in Australia suggests it is a story missing half its plot Packed full of insights from government and digital leaders from around Australia and across the world this is a much needed practical guide for public servants and leaders in any jurisdiction It contains insights and ideas about the way digital technologies and their associated tools platforms and cultures are changing the business of governing and the design and delivery of public policy and services Are We There Yet lucidly diagnoses how digital technologies including AI and big data are transforming the role of the public servant and the project of governance itself Stewart Weeks and Cooper describe the important shift from power to problem solving and explain how to harness digital transformation to make government work better for all of us Beth Noveck author of Wiki Government former Deputy Chief Technology Officer in the Obama White House Professor in Technology Culture Society New York University and Chief Innovation Officer for New Jersey I ve read a lot about the potential impact of digital technology on public services this is the first book to persuade me that the power of digital properly conceived really can transform the nature of democratic governance Professor Peter Shergold AC Chancellor Western Sydney University Former Secretary Department of Prime Minister and Cabinet

Demystifying China's Innovation Machine Marina Yue Zhang, Mark Dodgson, David Gann, 2022 China s extraordinary economic development is explained in large part by the way it innovates Contrary to widely held views China s innovation machine is

not created and controlled by an all powerful government Instead it is a complex interdependent system composed of various elements involving bottom up innovation driven by innovators and entrepreneurs and highly pragmatic and adaptive top down policy Using case studies of leading firms and industries along with statistics and policy analysis this book argues that China s innovation machine is similar to a natural ecosystem Innovations in technology organization and business models resemble genetic mutations which are initially random self serving and isolated but the best fitting are selected by the market and their impacts are amplified by the innovation machine This machine draws on China s multitude manufacturers supply chains innovation clusters and digitally literate population connected through super sized digital platforms China s innovation suffers from a lack of basic research and reliance upon certain critical technologies from overseas yet its scale size and scope diversity possess attributes that make it self correcting and stronger in the face of challenges China s innovation machine is most effective in a policy environment where the market prevails policy intervention plays a significant role when market mechanisms are premature or fail The future success of China s innovation will depend on continuing policy pragmatism mass innovation and entrepreneurship and the development of the new infrastructures
