Learning from the Future Mary Hykel Hunt, 2011-08-26 Learning from the future A neat eye catching turn of phrase that A good title for a book no doubt designed by some marketing sort to grab your attention because of course it's a

statement of the impossible You can't learn from the future because it hasn't happened yet Or can you Mary Hykel Hunt functioning intuitive and researcher in the field of human consciousness reveals that it's entirely possible to access your future AND that it's based on good demonstrable science Yes it'll require some considerable shift in your conventional thinking because reality is not as we see it as science is increasingly and convincingly revealing *Ockham's Razors* Elliott Sober, 2015-07-23 This book uses philosophy science and probability to analyse why simpler theories are better than theories that are more complex *The Oxford Handbook of Atheism* Stephen Bullivant, Michael Ruse, 2013-11-21 Recent books by among others Sam Harris Richard Dawkins and Christopher Hitchens have thrust atheism firmly into the popular media and academic spotlight This so called New Atheism is arguably the most striking development in western socio religious culture of the past decade or more As such it has spurred fertile and often heated discussions both within and between a diverse range of disciplines Yet atheism and the New Atheism are by no means co extensive Interesting though it indeed is the New Atheism is a single historically and culturally specific manifestation of positive atheism the that there is are no God's which is itself but one form of a far deeper broader and more significant global phenomenon The Oxford Handbook of Atheism is a pioneering edited volume exploring atheism understood in the broad sense of an absence of belief in the existence of a God or gods in all the richness and diversity of its historical and contemporary expressions Bringing together an international team of established and emerging scholars it probes the varied manifestations and implications of unbelief from an array of disciplinary perspectives philosophy history sociology anthropology demography psychology natural sciences gender and sexuality studies literary criticism film studies musicology and in a range of global contexts Western Europe North America post communist Europe the Islamic world Japan India Both surveying and synthesizing previous work and presenting the major fruits of innovative recent research the handbook is set to be a landmark text for the study of atheism **The Cause and Evolution of the Universe: Fact and Myth in Modern Astrophysics** John Auping Birch, 2018-01-01 The work of Dr John Auping seeks to assist readers to differentiate observationally verified aspects of cosmology from ideas whose verification is distant or perhaps impossible Such a task is performed by using a careful application of the orthodox scientific method This English edition is a part of Auping's original work especially devoted to the description of the dynamics of stars and the analysis of the Big Bang steady state and multiverse models from a critical point of view The author approaches different aspects of the evolution of the Universe using different branches of astrophysics Newtonian mechanics nuclear physics thermodynamics quantum physics and general relativity with a clear and concise narrative Mathematical boxes support the deeper study of mathematical physical relations which can be omitted by readers who are not specialised The Illogical World John Lambert, 2025-07-14 This is a fresh look at 100 paradoxes explained in a clear way without obfuscating philosophical jargon or esoteric language It is lively and entertaining as well as being challenging with realistic examples and instructive diagrams to elucidate points being made The paradoxes are organised into nine specific subject areas and a

unique coloured page design is used to explain and solve them It challenges our understanding in a wide range of areas deduction and induction finity and infinity force and matter free will randomness and determinism logic and self reference morality metaphysics God perception probability relativity uncertainty undefinability unknowability and unprovability Only original sources are used which are listed extensively If you ever wanted to know what paradoxes are about and where they go wrong this is the book for you **Philosophy and Salvation** Carlos Blanco,2012-10-23 The idea of salvation tends to be interpreted as an exclusively religious category The author of this essay believes that philosophy the quintessence of human thinking possesses a salvific power as it offers the possibility of broadening the horizons of humanity leading us out of the oppressive limits of our hic et nunc However philosophical salvation needs to be found in time and space The edification of a society based upon the ideal of solidarity in which history may be meaningful for everyone is its preeminent manifestation

A Dark History of Modern Philosophy Bernard Freydborg,2017-08-14 This provocative reassessment of modern philosophy explores its nonrational dimensions and connection to ancient mysteries Delving beneath the principal discourses of philosophy from Descartes through Kant Bernard Freydborg plumbs the previously concealed dark forces that ignite the inner power of modern thought He contends that reason itself issues from an implicit and unconscious suppression of the nonrational Even the modern philosophical concerns of nature and limits are undergirded by a dark side that dwells in them and makes them possible Freydborg traces these dark sources to the poetry of Hesiod the fragments of Heraclitus and Parmenides and the Platonic dialogues and claims that they rear their heads again in the work of Spinoza Schelling and Nietzsche Freydborg does not set forth a critique of modern philosophy but explores its intrinsic continuity with its ancient roots **Reforming Apologetics** J. V. Fesko,2019-03-19 Challenging the dominant Van Tillian approach in Reformed apologetics this book by a leading expert in contemporary Reformed theology sets forth the principles that undergird a classic Reformed approach J V Fesko s detailed exegetical theological and historical argument takes as its starting point the classical Reformed understanding of the two books of God s revelation nature and Scripture Believers should always rest on the authority of Scripture but also can and should appeal to the book of nature in the apologetic task **Ethical Violence**

Carlo Bordoni,2023-10-16 Human civilization is founded on ethical principles norms of behaviour that have accumulated over time Perhaps the oldest of ethical principles is the rejection of violence which includes the respect for life and for the physical and psychological integrity of others But in some circumstances violence itself can be regarded as ethical for example when it is used by states claiming to act in self defence In these circumstances the need to defend oneself against an enemy can transform war from an unacceptable act into a necessary socially shared and morally sanctioned choice And it is when violence becomes ethical that we must begin to fear for our future In the wake of the pandemic we are witnessing the growing prevalence of aggression and emotionality in social and political life We find ourselves living in an increasingly impatient and insecure society which is sceptical of scientific thought and which takes refuge in the irrational The decline of

rationality and the growing prevalence of violence are increasingly common features of a society that has lost touch with the great Enlightenment narrative We need argues Bordoni to rediscover the rationality we have lost and recuperate the positive side of technology **Psychedelic Humanities** Erika Dyck,Tehseen Noorani,Nicolas Langlitz,Alex Dymock, Anne Katrin

Schlag ,Oliver Davis,2024-06-19 Psychedelics are part of a resurgence of interest in consciousness studies especially as altered states of consciousness are being re examined in the context of psychedelic assisted therapies To date discussions about psychedelics in modern medicine have been dominated by studies in biomedicine However given that cultural factors play a significant role in the subjective effects of psychedelics psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences **The**

Transcendent Brain Alan Lightman,2024-08-20 From the acclaimed author of Einstein s Dreams comes a rich fascinating answer to the question Can the scientifically inclined still hold space for spirituality Lightman belongs to a noble tradition of science writers including Oliver Sacks and Lewis Thomas who can poke endlessly into a subject and stir up fresh embers of wonder The Wall Street Journal Gazing at the stars falling in love or listening to music we sometimes feel a transcendent connection with a cosmic unity and things larger than ourselves But these experiences are not easily understood by science which holds that all things can be explained in terms of atoms and molecules Is there space in our scientific worldview for these spiritual experiences According to acclaimed physicist and novelist Alan Lightman there may be Drawing on intellectual history and conversations with contemporary scientists philosophers and psychologists Lightman asks a series of thought provoking questions that illuminate our strange place between the world of particles and forces and the world of complex human experience Can strict materialism explain our appreciation of beauty Or our feelings of connection to nature and to other people Is there a physical basis for consciousness the most slippery of all scientific problems Lightman weaves these investigations together to propose what he calls spiritual materialism the belief that we can embrace spiritual experiences without letting go of our scientific worldview In his view the breadth of the human condition is not only rooted in material atoms and molecules but can also be explained in terms of Darwinian evolution What is revealed in this lyrical enlightening book is that spirituality may not only be compatible with science it also ought to remain at the core of what it means to be human **Naked** Leslie Masters MD,2010-05-07 In Naked This is My StoryThis is Our Song Dr Masters has

Postdigital Theologies Maggi Savin-Baden, John Reader, 2022-09-01 This book is about the relationships between technologies and the content of religious belief and practice A number of models are now starting to emerge but each of these depends on the theological or philosophical framework within which the debate is set At the same time there are dilemmas operating at different ends of the spectrum For example at one end there is a tendency towards subsuming the digital within the divine and at the other an instrumental stance relating to how technology is deployed Either of these stances could be said to ignore rather than acknowledge that the human itself is being changed as a result of the interactions with the digital The book explores the following areas Where is God to be found or present in the postdigital condition What are the implications of the postdigital condition for spirituality and indeed for the activity of God

through the Holy Spirit How do concepts of transhumanism or posthumanism effect understandings of the incarnation Does the doctrine of the Trinity need revisiting in the light of the digital as medium of relationship Does Creation now include the postdigital What of the Kingdom of God now that the kingdom of the Tech giants is so powerful all consuming John Williamson Nevin Linden J. DeBie,2023-09-21 John Williamson Nevin s life has never been given the full attention that it deserves That may be due in part to the controversial nature of his thinking Yet in many respects his enormous contribution to American religious history is acknowledged by those who have read him He stood out as the great advocate of evangelical catholicism and his call for a thorough examination of the place of the church in nineteenth century theology was revolutionary It was Nevin who first saw the threat to the church in the erosion of faith in the church as a divine institution sacramentally entrusted by God with the reclamation of the whole world an erosion that occurred well before the Civil War in the hypersubjectivity of Protestant America

Utopianism for a Dying Planet Gregory Claeys,2022-09-06 How the utopian tradition offers answers to today s environmental crises In the face of Earth s environmental breakdown it is clear that technological innovation alone won t save our planet A more radical approach is required one that involves profound changes in individual and collective behavior Utopianism for a Dying Planet examines the ways the expansive history of utopian thought from its origins in ancient Sparta and ideas of the Golden Age through to today s thinkers can offer moral and imaginative guidance in the face of catastrophe The utopian tradition which has been critical of conspicuous consumption and luxurious indulgence might light a path to a society that emphasizes equality sociability and sustainability Gregory Claeys unfolds his argument through a wide ranging consideration of utopian literature social theory and intentional communities He defends a realist definition of utopia focusing on ideas of sociability and belonging as central to utopian narratives He surveys the development of these themes during the eighteenth and nineteenth centuries before examining twentieth and twenty first century debates about alternatives to consumerism Claeys contends that the current global warming limit of 1.5C 2.7F will result in cataclysm if there is no further reduction in the cap In response he offers a radical Green New Deal program which combines ideas from the theory of sociability with proposals to withdraw from fossil fuels and cease reliance on unsustainable commodities An urgent and comprehensive search for antidotes to our planet s destruction Utopianism for a Dying Planet asks for a revival of utopian ideas not as an escape from reality but as a powerful means of changing it
