Fisiología Umana Silverthorn:

Fisiología humana Dee Unglaub Silverthorn, 1982 Para comprender adecuadamente la fisiología es necesario construir una visión general acerca de cuál es el cuerpo, sus sistemas y aparatos y los numerosos procesos que los mantienen en funcionamiento. Esta visión global denominada integración de los sistemas constituye un tema clave de este libro. La cuarta edición de Fisiología Humana un enfoque integrado conserva las estrategias didácticas que resultaron tan populares desde su primera publicación en 1998.

Information Technology in Biomedicine Paweł Badura, Joanna Czajkowska, Arkadiusz Gertych, Jacek Kawa, Ewa Piętka, Wojciech Wieclawek, 2025-06-19 This book presents 10th International Conference Information Technologies in Biomedicine and shows research on Information Technologies in Medicine. The aim of this issue is to address the requirements for innovative technologies in computer aided diagnosis and therapy and to indicate new areas of research including the integration of multimodal data implemented in various fields of medical diagnostics. Fast and reliable data processing techniques able to deliver results in a user friendly manner are discussed in three sections. First the AI and Image Analysis Applications in Medicine section features AI driven studies for image processing including comparisons of deep learning models for nuclear detection and segmentation and optimal scanning settings for biological samples. It also covers the importance of multimodal imaging analysis in radiological studies and chronic wound treatment. Then Biomedical Signal Processing section investigates the effect of music on brain activity through EEG signal analysis. Artificial intelligence assisted speech diagnostics in children focuses on sound segmentation and speech disorder detection. The effect of electronic cigarettes is tested by comparing the ECG of smokers and the control group. Finally Modeling Simulation and Therapy Support section presents technologies in patient care including telemedicine for rehabilitation, analysis of neurodegenerative diseases and therapeutic applications of music. Models for supporting chronic wound treatment and amblyopia therapy are described. This book is a great reference tool for scientists who deal with problems of designing and implementing information processing tools employed in systems that assist the clinicians, radiologists and physiotherapists in patient diagnosis and treatment. It also serves students in exploring innovations in quantitative medical data analysis, data mining and artificial intelligence.

Best & Taylor. Bases Fisiológicas de la Práctica Médica, 2010 La obra incorpora una diferencia de la edición anterior reconocidos colaboradores extranjeros de México, Venezuela, España, Estados Unidos, Perú y Colombia. Acompañando los requisitos que exigen los organismos evaluadores de los diferentes países de Latinoamérica, la obra incluye competencias más distribuidas a lo largo del libro. Cada capítulo inicia con un caso clínico que permite colocar los contenidos en un contexto clínico adecuado. Ese caso se desarrolla a lo largo de cada capítulo y al final se ubica la resolución que sirve para evaluar la comprensión del capítulo en base a preguntas sobre el caso. Respecto de la edición anterior presenta un cambio sustancial en contenidos de cardiovascular, respiratorio y renal, tejidos adiposos y psiconeuroinmunología. Incluye nuevos contenidos sobre metabolismo esquelético adaptados a la altura y el ejercicio, distribuidos a lo largo de diferentes capítulos.

Melatonin is not only meant to make you sleep Rosana Dantas,2020-02-15 The days the seasons the years pass by Our body can predict and prepare itself for the environmental changes Predictability is very important to optimize its performance However how do our cells know when it is day night summer or winter They need a signal and that s where melatonin comes in It is a hormone produced by a gland in the middle of our brain called pineal gland Pineal gland only produces melatonin at night and in the dark So melatonin is the sign our cells were waiting to tell them it is night It turns out that in the modern world we are overexposed to light People work at night when they should be sleeping Blue light coming from our TV computer or smartphone can block melatonin production Light exposure at night prevents our body to predict properly the environmental
