Flow In Open Channels K Subramanya Solution:

Gradually-varied Flow Profiles in Open Channels Chyan-Deng Jan, 2014-01-08 Gradually varied flow GVF is a steady non uniform flow in an open channel with gradual changes in its water surface elevation The evaluation of GVF profiles under a specific flow discharge is very important in hydraulic engineering This book proposes a novel approach to analytically solve the GVF profiles by using the direct integration and Gaussian hypergeometric function Both normal depth and critical depth based dimensionless GVF profiles are presented The novel approach has laid the foundation to compute at one sweep the GVF profiles in a series of sustaining and adverse channels which may have horizontal slopes sandwiched in between them

Valuation of Ecosystem Services of Tropical Mixed Deciduous Forests Prakash Chandra Mishra, 2021-04-08 This book is based on my scientific study on a Protected Area This PA is inhabited by many villages and is situated very close to Tata Steel Township Jharkhand India These forests serve as the socio economic backbone for thousands of poor villagers living in and around this

Sanctuary Lack of clear policy goals in governance and poor institutional frame work along with inadequate information on ever increasing demand of ecosystem services has led to many catastrophic irreversible ecosystem damages Quantitative evidences on economic value needs to be generated because many consequential benefits are not tradable in the markets In this study I have valued some of the major tangible ecosystem services such as carbon oxygen fuel wood fodder non timber forest products supply of quality drinking water and recreation through scientific methods The ecosystem service value is not taken in to account in the Nation s GDP and thereby never influenced the decision making bodies of the Government towards sustainable ecosystem management efforts This PA is also highly damaged by incessant disturbances to fauna flora assemblages and their micro ecological intricacies This study is an effort to reorient the policy priorities so as to effectively conserve our precious heritage for the future generations
