Design Practices In Design Thinking Lucykimbell:

Different Perspectives in Design Thinking Yvonne Eriksson, 2022-03-02 Globalization and digitalization are buzz words in contemporary society. They affect both our private and our professional lives. Society has become more diverse with easier access to information and to virtual platforms that gives us opportunity to be in touch with colleagues, friends, family etc at any time. A complex environment is emerging wherein internet of things and big data are being integrated with products, production systems, healthcare and daily activity and play an important part in decision making. This has an impact on future designs and the role of designers. Responsible designers with a holistic perspective are needed. The book highlights several aspects of design thinking such as Information Design and Critical Design. The meaning of culture, gender and disabilities are also discussed. The functions of Information Design are changing from showing the way, instruction manuals and graphic design. It will affect among others healthcare, technology, smart products and Industry 4.0. Design thinking perspective that includes users from the entire chain and from the producer to the end user of the product or service is needed. This will also require gender and culture issues to be taken into consideration in designing products and services. Design thinking methods and critical aspects of design will contribute to an inclusive society. **Craft and Design Practice from an Embodied**

Perspective Nithikul Nimkulrat, Camilla Groth, 2024-07-01 This book brings together contributors from multiple disciplines such as crafts, design, art, education, cognitive philosophy and sociology to discuss craft and design practice from an embodied perspective. Through theoretical overviews of embodied cognition and research based cases that involve the researchers making experiences, different phenomena of human material interaction are presented, analysed and discussed. The practical cases exemplify ways in which embodied notions show up in action. Contributors examine topics such as the embodied basis of craft activities and material manipulation, experiential knowledge and skill learning, reflection in and on action and material dialogues. Several chapters specifically discuss the hybrid forms of analogue and digital crafting that increasingly takes place in the field of crafts and design and the changed notions of material engagement that this entails. The book will appeal to scholars of crafts, design, art, education, anthropology and sociology.
