Import Alert # 99-33

Published Date: 03/04/2021

Type: DWPE

Import Alert Name:

Detention Without Physical Examination of Products from Japan Due to Radionuclide Contamination

Reason for Alert:

NOTE: Revisions to this Import Alert dated March 4, 2021 updates reason for alert with March 2021 edit and removes one product in the Guidance section under IWATE PREFECTURE. Changes are noted and bracketed by asterisks ("**").

On March 11, 2011, an 8.9 magnitude earthquake triggering a 30 ft tsunami struck the Pacific Coast of Japan. The force of the tsunami destroyed a great deal of the infrastructure along portions of the Japanese coast. The most notable damage from the tsunami affected the Fukushima Daiichi nuclear plant. The following prefectures are in the closest proximity to the Fukushima Daiichi nuclear plant: Fukushima, Gunma, Ibaraki, and Tochigi.

The Fukushima Daiichi nuclear plant houses several nuclear reactors that pose of a potential threat of radiological contamination to the surrounding areas. Due to the public health concerns that are associated with radiation and nuclear contamination, FDA has increased surveillance of regulated products from Japan.

On March 19, 2011, the Japanese Ministry of Health, Labour and Welfare confirmed the presence of radioactive iodine contamination in dairy, fresh produce, and infant formula products. Japanese data analyses revealed that the food products measured from March 16-18, 2011, indicated the presence of radioactive iodine was five times the acceptable levels. The elevated levels were identified in products tested in Kawamata Town, Fukushima prefecture and Ibaraki prefecture; areas around the Fukushima Daiichi nuclear power plant.

Though radioactive iodine has a short half-life of about 8 days and decays naturally within a matter of weeks, there is a risk to human health if radioactive iodine in food is absorbed into the human body. If ingested, it can accumulate in and cause damage to the thyroid. Children and young people are particularly at risk of thyroid damage due to the ingestion of radioactive iodine.

On March 21, 2011, the Japanese Prime Minister ordered the Governors of the affected prefectures of Fukushima, Gunma, Ibaraki, and Tochigi to stop the distribution of spinach and kakeina (a local Japanese vegetable) into the market and ordered the Governor of Fukushima prefecture to stop the distribution
