FRANK ANTHONY TAUCHER author of *The Supertrader's Almanac* *Commodity Trader's Almanac* *Masters of Mathematics* Robert A. Nowlan, 2017-05-13 The original title for this work was *Mathematical Literacy: What Is It and Why You Need It* The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It's not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics *Mastering the Trade, Third Edition: Proven Techniques for Profiting from Intraday and Swing Trading Setups* John F. Carter, 2018-06-29 The go to guide for launching a lucrative career in trading fully updated for today's turbulent markets One of today's most successful traders John F. Carter has made his popular guide more relevant and effective than ever This new edition of *Mastering the Trade* includes the essential content that has made it a bestselling classic and includes critical new information for making the best trading decisions in every situation Combining insightful market overview with trading strategies and concepts Carter provides Proven set ups with optimal markets and non negotiable trading rules Exact entry exit and stop loss levels for swing and intraday trading Seven key internals from Skew to VIX Pre market checklist for analyzing recent market behavior Scanning techniques for pinpointing high probability setups Effective risk control techniques Methods for ensuring your computer runs at max speed Techniques for predicting market corrections From valuable hardware and software to market mechanics pivot points and position sizing Carter delivers a suite of tools for beating out the competition on a regular basis *Mastering the Trade Third Edition* builds your expertise in knowing what's working for you and what's working against you so you make a living on the frontlines of professional trading **Quantum Finance** Raymond S.
