Storfnier BA (hons.) Business & Economics, Frederik D. Altmann Dipl.-Kfm. und DVFA/Investmentan, Björn Borchers

Bankkaufmann und Gewinner des VT, 2009-08-17 Das Buch *Tradingwelten* richtet sich nicht nur an den Einsteiger sondern

zeigt auch dem erfahrenen Trader neue Möglichkeiten auf den Börsenalltag effizienter zu gestalten. Aber auch interessierte Anleger, private Daytrader und Studierende finden eine Fülle von Tools und praktischen Tipps. Jürgen Nowacki ist es überzeugend gelungen, die Brücke zwischen den einzelnen Fachbeiträgen zu moderieren und damit eine Beziehung zwischen Leser und Koautoren herzustellen. Damit erhält der Leser die Möglichkeit, verschiedenste Handelsansätze kennen zu lernen.

Claus Nowak, Maschinen-Dipl.-Betriebswirt, Unternehmensberater und Eigenhändler. Dieses Buch kann für jeden eine Bereicherung sein, der sich mit der Verwaltung von Stiftungen oder Familienvermögen befasst. Ein Fachbuch, welches ohne mathematische Formeln das Mysterium um alternative Investment Strategien aufklärt. Die Botschaft lautet: Chaos wirksam managen, aus Gewinnen und Verlusten lernen.

Thomas K. Morse, Verbrüderter KG-Wirtschaftsprüfungsgesellschaft. Der Autor versteht es in diesem Buch, Quereinsteigern und Hobbyspekulanten genauso wie dem Semiprofi komplizierte Sachverhalte für einen praktikablen, klugen Umgang mit den Märkten darzustellen. 20 Jahre Erfahrung als Broker und Vermögensberater stellen sich hier auf das Beste dar. Man merkt den Autoren an, dass sie die an sich trockene Materie mit maximaler Leichtigkeit vermitteln wollen. Keine unendlich ausgeführte Börsenprosa, sondern jedes Kapitel für sich nachvollziehbare und in Eigenregie umsetzbare Rezepte. Besonders erfreulich sind die Kopiervorlagen als Organisationshilfen für ein individuelles Logbuch eines privaten Portfolios. Bei der Vielzahl an Fachbüchern endlich eines, das die Lücken aufarbeitet. Es ist ein Buch, das in jeder Hinsicht voll meinen Wünschen entspricht.

**Masters of Mathematics** Robert A. Nowlan, 2017-05-13 The original title for this work was Mathematical Literacy What Is It and Why You Need it The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It's not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical

ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics     Technical Analysis And Financial Asset Forecasting: From Simple Tools To Advanced Techniques Raymond Hon-fu Chan, Alan Wing-keung Wong, Spike Tsz-ho Lee, 2014-08-19 Technical analysis is defined as the tracking and prediction of asset price movements using charts and graphs in combination with various mathematical and statistical methods More precisely it is the quantitative criteria used in predicting the relative strength of buying and selling forces within a market to determine what to buy what to sell and when to execute trades This book introduces simple technical analysis tools like moving averages and Bollinger bands and also advanced techniques such as wavelets and empirical mode decomposition It first discusses some traditional tools in technical analysis such as trend Line trend channel Gann s Theory moving averages and Bollinger bands It then introduces a recent indicator developed for stock market and two recent techniques used in the technical analysis field wavelets and the empirical mode decomposition in financial time series The book also discusses the theory to test the performance of the indicators and introduces the MATLAB Financial Toolbox some of the functions codes of which are used in our numerical experiments
