Sustainability of Integrated Water Resources Management Shimelis Gebriye Setegn,Maria Concepcion Donoso,2015-09-04 The main focus of this book is sustainable management of water resources in a changing climate The book also addresses the question of how to define and measure the sustainability of Integrated Water Resources Management IWRM The sustainability of IWRM is an important issue when planning and or developing policies that consider the impact of climate change water governance and ecohydrology in the context of a more holistic approach to ensure sustainable management of water resources Sustainable IWRM is more about processes and

relatively little systematic or rigorous work has been done to articulate what components are the most essential to ensure the ongoing sustainability of IWRM efforts. The chapters cover topics including global perspective of IWRM allocation of environmental flows in IWRM, ecohydrology, water resources and environmental sustainability, climate change and IWRM, IWRM and water governance including social, economic, public health and cultural aspects, climate change resiliency actions related to water resources management, sustainability and tools in support of sustainability for IWRM. This book will be of interest to researchers, practitioners, water resources managers, policy and decision makers, donors, international institutions, governmental and non governmental organizations, educators as well as graduate and undergraduate students. It is a useful reference for Integrated Water Resources Management, IWRM, ecohydrology, climate change impact and adaptations, water governance, environmental flows, geographic information system and modeling tools, water and energy nexus and related topics.

Globalization Brian Spooner, 2015-03-27. Throughout human history the rate of world population growth overall has been outpaced by the rate of urban population growth. Right now more than half the world's population lives in cities and that proportion will only increase in the next fifty years. Rapid urban growth accelerates the exchange of ideas, the expansion of social networks and the diversity of human interactions that accompany globalization. The present century is therefore the crucial phase when the world's increasing interconnectedness may give rise to innovation and collaboration or intensify conflict and environmental disaster. Bringing together scholars of anthropology and social science as well as law and medicine, *Globalization: The Crucial Phase* presents a holistic and comprehensive understanding of the way the world is changing. The contributors reveal the changing scale of social, economic and financial diversity, examine the impact of globalization on the environment, health and nutrition and consider the initiatives to address the social problems and opportunities that arise from global migration. Collectively these diverse interdisciplinary perspectives provide an introduction to vital research and policy initiatives in a period that will bring great challenges but also great potential.
