International Books in Print ,1997 Financial Innovation and Engineering in Islamic Finance Samir Alamad,2017-04-13 This book provides two important contributions to existing theories in the financial innovation literature First it extends the existing literature of innovation orientation to a completely new field and construct that is based on a

religious imperative as a framework within which financial innovation is constrained It explains how an innovation orientation in IFIs can be directed within religious rules which indicates that innovation orientation in IFIs is a learning philosophy Second the book introduces and examines the plasticity of Shariah as a shared boundary object and its dynamic role in managing tension and conflicting values in the financial innovation process Furthermore building on the empirical results the study illustrates the insights that each theoretical lens affords into practices of collaboration and develops a novel analytical framework for understanding religious orientation towards financial innovation This practical contribution of the developed framework could form the basis for a standardised framework for the Islamic finance industry The book concludes by noting the policy and managerial implications of its findings and provides directions for further research

Financial Management: Principles and Applications J William Petty, Sheridan Titman, Arthur J Keown, Peter Martin, John D Martin, Michael Burrow, 2015-05-20 The sixth edition of Financial Management provides students with an overview of financial management suited to the first course in finance The focus of the text is on the big picture providing an introduction to financial decision making grounded in current financial theory and the current state of world economic conditions Attention is paid to both valuation and capital markets as well as their influence on corporate financial decisions The 10 basic principles of finance are introduced in the first chapter and woven throughout the text to give students a solid foundation from which to build their knowledge of finance The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete understanding of the subject This will give them the ability to apply what they have learnt to new and as yet unforeseen problems in short to educate students in finance
