Abstract: Predicting corporate financial distress has become an important topic, especially after the great financial crisis of 2008. Most of the previous studies on this topic have only focused on financial ratios to develop prediction models. The shift from physical resources to a knowledge-based economy has increased the importance of Intellectual Capital (IC) for the firms. This study uses IC indicators along with traditional financial ratios to develop a model which can be used to predict corporate financial distress. The study focused on 12 failed and 12 matching successful firms from the New Zealand stock exchange from 2001 to 2014. The results show that the overall accuracy has increased from 82% to 92% after including IC indicators as predictors. Four financial ratios namely sales to fixed assets, sales to current assets, current ratio and firm size have been found to be significant predictors. The results indicate that IC indicators can be included in corporate financial prediction models. The results are useful for the investors who can use this model, by including IC indicators, to assess the financial health of a firm before making investment related decisions.

INTRODUCTION

Financial evaluation and the survival of companies have been the focus of academic research since the seminal work of Altman (1968). Investors require predictions about the company in terms of financial stability and earning power (Lee et al., 2010), and this is why different financial distress prediction models have earned great importance in the field of accounting and finance. The advantage of developing a financial prediction model is that companies can forecast their future by using current information. The findings of the prediction models can be used by the managers to adjust their strategic plans and investments. Prediction models can also be used as corrective measures if certain operations are found to be incorrect or not performing properly. One of the key beneficiaries of corporate financial prediction is investors who can use forecasted results to make investment decisions (Li et al., 2011).

Understanding and Predicting Systemic Corporate Distress: A Machine-Learning Approach Ms. Burcu Hacibedel,Ritong

Qu,2022-07-29 In this paper we study systemic non financial corporate sector distress using firm level probabilities of default PD covering 55 economies and spanning the last three decades Systemic corporate distress is identified by elevated PDs across a large portion of the firms in an economy A machine learning based early warning system is constructed to predict the onset of distress in one year s time Our results show that credit expansion monetary policy tightening overvalued stock

prices and debt linked balance sheet weaknesses predict corporate distress We also find that systemic corporate distress events are associated with contractions in GDP and credit growth in advanced and emerging markets at different degrees and milder than financial crises International Finance and Accounting Handbook Frederick D. Handbook of Empirical Research on Islam and Economic Life M. Kabir Hassan, 2016-12-30 In Islamic jurisprudence a comprehensive ethic has been formulated governing how business and commerce should be run how accountability to God and the community is to be achieved and how banking and finance is to be arranged This Handbook examines how well these values are translated into actual performance It explores whether those holding true to the system are hindered and put at a disadvantage or whether the Islamic institutions have been able to demonstrate that faith based activities can be rewarding both economically and spiritually

Berücksichtigung nichtlinearer Zusammenhänge bei der Insolvenzprognose Thorsten Ohliger, 2016-08-31 Zur Ermittlung des Kreditrisikos sowie des konomischen und regulatorischen Eigenkapitals ist die Insolvenz bzw Ausfallwahrscheinlichkeit eines Schuldners eine zentrale Komponente Vor diesem Hintergrund ist es verst ndlich dass in Wissenschaft und Praxis

bereits diverse statistische Methoden zur Schätzung der Insolvenzwahrscheinlichkeit untersucht wurden. Dabei besteht ein Zielkonflikt zwischen Genauigkeit und Einfachheit des Prognosemodells. Beispielsweise kann aufgrund theoretischer Überlegungen angenommen werden, dass manche Kennzahlen der Jahresabschlussanalyse nicht monoton auf die Insolvenzwahrscheinlichkeit wirken, sondern die jeweilige Sensitivität abhängig vom Kennzahlenniveau ist. Bisher konnten solche Zusammenhänge allerdings nur in solchen Modellklassen adäquat berücksichtigt werden, die in der praktischen Anwendung Schwierigkeiten hinsichtlich der Interpretation haben. Mit der vorliegenden Arbeit wird die Zielsetzung verfolgt, Kennzahlen der Jahresabschlussanalyse hinsichtlich nichtlinearer Zusammenhänge mit der Insolvenzwahrscheinlichkeit zu untersuchen und solche Zusammenhänge im Modell anschaulich zu berücksichtigen. Dafür werden Generalisierte Additive Modelle auf Basis von penalisierten Regressionssplines verwendet und mit Generalisierten Linearen Modellen verglichen, wodurch der Effekt der nichtlinearen Zusammenhänge frei von anderen Einflüssen separiert werden kann. Außerdem werden Branchenbesonderheiten der Kennzahlen vorab bereinigt. Im Ergebnis zeigt die auf über 50.000 Jahresabschlüssen basierende empirische Analyse, dass bei den meisten Kennzahlen nichtlineare Zusammenhänge bestehen und diese auch ökonomisch plausibel sind. Darauf aufbauend wird gezeigt, dass die zusätzliche Modellkomplexität durch eine höhere Prognosegüte abgelagert wird. Das gilt insbesondere dann, wenn ökonomisch relevante Kosten aus Fehlklassifikationen in der Modellbewertung berücksichtigt werden.

Sergi, 2021-03-01 Recent Developments in Asian Economics is a crucial resource of current cutting edge research for any scholar of international finance and economics. Chapters cover a wide range of topics such as social welfare systems, organizational culture, sustainability, the impact of economic policy, uncertainty, and more. *Sustainable Future: Trends, Strategies and Development* Siska Noviaristanti, Ong Hway Boon, 2022-12-22 The book contains a selection of papers that were presented at the 3rd Conference in Managing Digital Industry Technology and Entrepreneurship 3rd CoMDITE with the theme Sustainable Future Trends, Strategies and Development. The Millennium Development Goals continued as Sustainability Development Goals (SDGs) are effective instruments and have in recent years brought many positive changes in numerous countries around the world. Most notably, it has fundamentally changed our way of approaching the tangled set of challenges States today undertake to achieve concrete development goals, transparency and accountability to citizens, and the global public has become a matter of course, and cooperation between the political, economic and societal spheres is no longer questioned. However, in addition to the global pandemic situation, it has challenged the business world to develop an outstanding strategy to face extreme uncertainty. Using digital technology and its advancement is believed to be one of the main keys for taking up this challenge. The 3rd Conference in Managing Digital Industry Technology and Entrepreneurship the 3rd CoMDITE has brought forward discussions on implementation of digital technology in strategic operation, finance, marketing, human resources management, and entrepreneurship around sustainable future issues.
