 Thorsten Beck, Augusto de la Torre, 2006 Access to financial services or rather the lack thereof is often indiscriminately
 decried as a problem in many developing countries The authors argue that the problem of access should rather be analyzed
 by identifying different demand and supply constraints They use the concept of an access possibilities frontier drawn for a
 given set of state variables to distinguish between cases where a financial system settles below the constrained optimum
 cases where this constrained optimum is too low and in credit services cases where the observed outcome is excessively high
 They distinguish between payment and savings services and fixed intermediation costs on the one hand and lending services
 and different sources of credit risk on the other hand The authors include both supply and demand side frictions that can
 lead to lower access The analysis helps identify bankable and banked population the binding constraint to close the gap
 between the two and policies to prudently expand the bankable population This new conceptual framework can inform the
 debate on adequate policies to expand access to financial services and can serve as the basis for an informed measurement of
 access *Fundamentals of Investing* Lawrence J Gitman, Michael D Joehnk, Scott Smart, Roger H Juchau, 2015-05-20 What

 Kusters, A.H. Meltzer, 2012-12-06 financial markets suggests that factors such as differences in capital requirements limi
 tations on size or on the range of financial activities in which firms can engage government guarantee arrangements for
 deposits or payments and reporting or disclosure requirements can have important effects on the efficiency of industrial and
 commercial firms and thus on the international competitive positions of major sectors of the U S economy Regulatory and tax
 policies must therefore take into account effects on international competitive positions in addition to domestic concerns The
 articles in this issue analyze differences in market organization and regulation across countries and examine how efficiency
 in producing financial services is influenced by these differences These articles were presented and discussed at a
