ABSTRACT

This paper is a causality and impact study on financial deepening and economic growth in Nigeria for a 33-year period covering 1981 – 2013. The study used the Phillips-Peron test for unit root to ascertain whether the variables are stationary or not. The VEC residual normality test and the Histogram-Normality test were utilized in order to determine if the data set were normally distributed. Test for a long run relationship was conducted with the aid of the Johansen cointegration test. The Error Correction Model as well as the Granger causality test was also employed. The findings revealed that there is a long run relationship between economic growth, broad money supply and private sector credit, with high speed of adjustment towards long run equilibrium. The results also revealed that while broad money has positive and non-significant impact on economic growth, private sector credit has negative and non significant impact on growth. The Granger causality test results showed that neither broad money supply nor private sector credit is granger causal for economic growth and vice versa. The study therefore recommends that private sector friendly policies should be implemented to ensure that investors do not only have access to

Financial Development and Economic Growth in Malaysia James B. Ang, 2008-11-25 This book is concerned with the role of financial intermediation in economic development and growth in the context of Malaysia Using an analytical framework the author investigates the Malaysian economy from 1960 onwards to examine how far financial development has progressed in the course of economic development and whether it has been instrumental in promoting economic growth A significant improvement in the Malaysian financial system coupled with rapid economic growth and a rich history of financial sector reforms makes Malaysia an interesting case study for this subject The author shows that some government interventions seem to have impacted negatively on economic growth whereas repressionist financial policies such as interest rate controls high reserve requirements and directed credit programmes seem to have contributed positively to financial development The analysis concludes that financial development leads to higher output growth via promoting private saving and private investment Shedding light on the evolutionary role of financial system and the interacting mechanisms between financial development and economic growth this book will be of interest to those interested in economic and financial development financial liberalization saving behaviour and investment analysis and Asian Studies

and economic categories as interplay of developing world characteristics in the context of redefined fundamental uncertainty Those concerns relate to the issues of small country finance the industrialization of the developing world the role of commodity cycles in the global economy sovereign debt speculative financial flows and currency pressures and connections between financial markets and real markets Compact and comprehensive this collection offers unique perspectives into contemporary issues of financial deepening and real macroeconomic development in small developing economies that rarely surface in the larger policy and development debates

Rethinking Financial Deepening Ms.Ratna Sahay,Martin Cihak,Mr.Papa N'Diaye,Mr.Adolfo Barajas,Ms.Diana Ayala Pena,Ran Bi,MissYuan Gao,Ms.Annette Kyobe,Lam Nguyen,Christian Saborowski,Katsiaryna Svirydenka,Mr.Reza Yousefi,2015-05-04 The global financial crisis experience shone a spotlight on the dangers of financial systems that have grown too big too fast This note reexamines financial deepening focusing on what emerging markets can learn from the advanced economy experience It finds that gains for growth and stability from financial deepening remain large for most emerging markets but there are limits on size and speed When financial deepening outpaces the strength of the supervisory framework it leads to excessive risk taking and instability Encouragingly the set of regulatory reforms that promote financial depth is essentially the same as those that contribute to greater stability Better regulation not necessarily more regulation thus leads to greater possibilities both for development and stability

Nugent, 2022-09-16 This book identifies the differences in growth and development and the various factors lying behind them across both Middle East and North African MENA and East Asian countries over the 1960 2020 period It considers a very wide range of factors compares initial situations institutions and government policies the dynamic responses to changing circumstances and discusses the inability of the governments of the MENA region to achieve not only political reform but also the kinds of economic reform that would allow their citizens to prosper in an increasingly globalized world The book focuses on Tunisia Since its independence in 1956 until 2010 Tunisia had considerable success relative to many other MENA countries but was somewhat less successful relative to East Asian countries Since 2010 however while transitioning away from autocracy to democracy it has been in rather serious economic decline The book highlights how both the factors identified as enabling Tunisia's initial success and those leading to its subsequent decline can provide many useful insights for improving the management of economic development across the whole MENA region and perhaps also to developing countries throughout the world **Measuring Financial Development in Sub-Saharan Africa** Mr. Enrique Gelbard, Mr. Sérgio Pereira. Leite, 1999-08-01 This study introduces an index for measuring financial development and a set of six indices representing key characteristics of the financial systems in 38 sub Saharan African countries The results show that these countries have made good progress in improving and modernizing their financial systems during the last decade particularly with regard to financial liberalization and the adoption of indirect instruments of monetary policy In many countries however the range of financial products remains extremely limited interest rate spreads are wide capital adequacy ratios are insufficient judicial loan recovery is a problem and the share of nonperforming loans is large **Proceedings of IAC 2018 in Vienna** Group of Authors, 2018-07-02 International Academic Conferences Teaching Learning and E learning IAC TLEI 2018 and Management Economics and Marketing IAC MEM 2018 and Engineering Transport IT and Artificial Intelligence IAC ETITAI 2018 **Development and Financial Reform in Emerging Economies** Kobil Ruziev, 2015-10-06 Modern development strategy relies heavily on uncompromising orthodox economic theory and a dogmatic faith in market efficiency In contrast the essays in this volume aim to emphasize the importance of historic experiences to evolve a more realistic and dynamic view of how such development could be formalized **African Development Indicators 2006** World Bank Publications, World Bank. Performance in Pacific and South East Asia David G. Dickinson,J.L. Ford,the late M.J. Fry,Andrew W. Mullineux,S. Sen,2000-01-01 this is an interesting and valuable collection of papers that addresses a highly topical area of research The quality of writing is high in the main and the econometric methodology and models transparent The appendices to many of the empirical chapters provide detailed information about data sources as well as model results The book should be required reading for researchers and graduate students in this field and the review papers provide valuable teaching material It will be especially useful for those concerned with the contribution of governance structures to economic performance financial crises and the still disputed relationship between growth and financial liberalization Jenifer Piesse Asia Pacific Business Review Finance Governance and Economic Performance in Pacific and South East Asia focuses on key aspects of government policy financial systems and their links to the economic miracle in Pacific and South East Asia It also considers the financial crises that have affected those economies and their economic progress The contributors examine the success of governance in the form of government involvement with the macroeconomy and with the deregulation of markets in general Attention is
