Bases fisiopatológicas del cuidado intensivo neonatal Quero, José, 2020-01-01. La primera intención al pensar en este escrito fue presentar a modo de apuntes una serie de ecuaciones y fórmulas matemáticas que con frecuencia querramos usar si las pudiéramos recordar cuando presentamos o comentamos la evolución en los países de visita de los recién nacidos asistidos en cuidados intensivos. Pronto fui consciente de las dificultades de tal empeño: eran muchas las ecuaciones y para poder ser utilizadas en situaciones clínicas concretas debían poder ser fácilmente encontradas y justificar sin grandes dificultades ser de interés aludir a ellas para lo cual parecía obligada la presencia de un texto explicativo junto a ecuaciones y fórmulas en defensa del valor que tendrían al entender su significado para hacer más atractivo el uso de las mismas. Los capítulos incluidos han sido elegidos en su mayor parte pensando en el razonamiento fisiopatológico basado en los principios físicos que sostienen las ecuaciones y fórmulas de mayor relevancia clínica del paciente críticamente enfermo. Como neonatólogo clínico he tenido que usar para la redacción de los mismos los conocimientos de los expertos en la fisiología de las diferentes reastratadas reproduciendo las definiciones, fórmulas, ecuaciones, gráficos y dibujos que en mi opinión sustentan los principios básicos de la aproximación pretendida. Buscaba con ello que esta aproximación científica ganara presencia en el razonamiento médico fuera fácilmente recordada y lograra que los neonatólogos se familiaricen con su uso en la práctica clínica. Me gustaba además que este pequeño texto fuera un estímulo para que siguiendo esta orientación basada en principios y leyes físicas un grupo de neonatólogos expertos y con ilusión escribiera un libro más detallado buscando la mayor objetividad y certeza en la interpretación fisiopatológica del cuadro clínico, la gravedad del mismo, el tratamiento mejor fundamentado y un pronóstico a corto, medio y largo plazo más ajustado.
