The Origin and Beginning of Matter and Life Alphons V. Versne, 2014-04-16 The Evolution versus Creation debate is presented in the Western world as the choice between Science and Faith Science is a system of acquiring knowledge using observation and experimentation to describe natural phenomena By this definition Evolution is as much a matter of Faith as Creation is The origin and beginning of what is cannot be observed and reproduced by experiments The book unveils the academic and educational fraud in the Western world that retain that what is came into existence by random change and natural selection against the findings of the Sciences especially over the last hundred years The phenomena of irreducible complexity and the information concept reduce Evolution to science fiction

Scientific Evidence of the Christian Faith, DNA — the Starting Point Victor W. Chang, Guoping Song, 2020-07-04 Does the Christian faith have scientific evidence This is difficult to believe However since DNA was discovered we now understand the entire DNA coding sequence of humans is consistent and the difference is only one thousandth The theory of mathematics probability tells us that it could not be the result of spontaneous generation Therefore the molecular biologist put forward that people of the whole world have the common grandfather Y chromosome Adam theory and the common grandmother Eve theory Do you agree What is amazing is that there is no difference between man's and woman's 2.9 billion chromosomal DNA coding sequence meaning that human DNA coding is

from one individual Only men have the complete set of the chromosome so the source individual must be a man and the first woman was from the man The first man had no carnal parents and it only could be Adam created by God Due to the constancy of biological genome DNA coding it is impossible for any species to have an evolution connection not even microevolution This is what is recorded in the Bible as all living from each category It therefore can be seen that life s DNA coding sequence is from God s Creation From our DNA we could see that all the substances and lives in the universe are created by God These scientific facts are totally consistent with the Biblical record and are objective evidence of the Christian faith
