

MIXTURES AND SOLUTIONS MODULE

On the Welcome page, click Preview under the grades 3–6 flag to see a brief overview of the 3–6 site.

Click the grades 3–6 icon to get a menu that links to each of the 3–6 modules. There you can choose Mixtures and Solutions and travel to a wealth of information and activities specific to that module for students, parents, and teachers. The section for students has an interactive activity; project posters, pictures, movies, websites, a vocabulary list, a list of books and software, and an “Ask a Scientist” section. Parents and teachers can go to a module summary, a link to home/school connections, resources, and tips and tricks for using FOSS in the classroom.

If possible, introduce FOSSweb to students using a computer connected to a large monitor or digital projector. After a group introduction, move students to the computer lab or to computer stations in your classroom. Students in grades 3–6 need to have a focus when they begin exploring FOSSweb on their own or in small groups. Consider using some of the following questions and ideas to get them started. You can allow more free exploration once students have learned how to use FOSSweb and have completed some introductory assignments.

In Mixtures and Solutions, you’ll find an activity called Junkyard Analysis. Introduce this activity after students have completed Investigation 1, *Separating Mixtures*. Students dig up items in a junkyard and decide whether the item will create a mixture or solution when added to water. You might ask,

- What is a mixture?
- What is a solution?
- What are some of the mixtures and solutions we have investigated?
