Wayne Phelps former commander of a Remotely Piloted Aircraft unit addresses these questions and many others as he tells the story of the men and women of today's air force Exploring the ethics of remote military engagement the misconceptions about PTSD among RPA operators and the specter of military weaponry controlled by robots his book is an urgent and compelling reminder that it should always be difficult to kill another human being lest we risk losing what makes us human

Dictionary of the Modern United States Military S.F. Tomajczyk, 2008-02-11 Warspeak the language of the military can be for many civilians and for members of differing services an unintelligible hodgepodge of acronyms slang terms and field operation expressions Few laypersons may know that the Five F's is a derogatory expression though Army Navy Marine Air Force Coast Guard and others know or can infer that airborne commandos are administrative and support personnel The more than 15 000 entries in this comprehensive dictionary provide an inside look at the United States military Weapons systems governmental agencies electronic warfare medical terms military infrastructure communications satellites and intelligence systems are among the topics covered in depth Also detailed are the acronyms and slang terms used by the soldiers in the field The work provides numerous cross references for ease of use along with a bibliography of over 2 200 sources

The Soviet Air and Strategic Rocket Forces, 1939-1980 Myron J. Smith, 1981 [Losing Control](#) Paul Rogers, 2021-07-20 Outstanding combines a glimpse behind the security screens with a sharp analysis of the real global insecurities growing inequality and unsustainability New Internationalist Written in the late 1990s Losing Control was years if not decades ahead of its time predicting the 9 11 attacks a seemingly endless war on terror and the relentless increase in revolts from the margins and bitter opposition to wealthy elites Now more than two decades later and in an era of pandemics climate breakdown and potential further military activity in the Middle East Asia and Africa Paul Rogers has revised and expanded the original analysis pointing to the 2030s and 40s as the decades that will see a showdown between a bitter environmentally wrecked and deeply insecure world and a possible world order rooted in justice and peace
