Gigantotyrannus Fossil is the fastest predator, faster even than the Tyrannosaurus or Spinosaurus. Since created in the same mold as the fastest predator, it can be said that it's the fastest of all. Even still, getting caught up in the jaws of a Gigantotyrannus would certainly leave you with a few scratches!

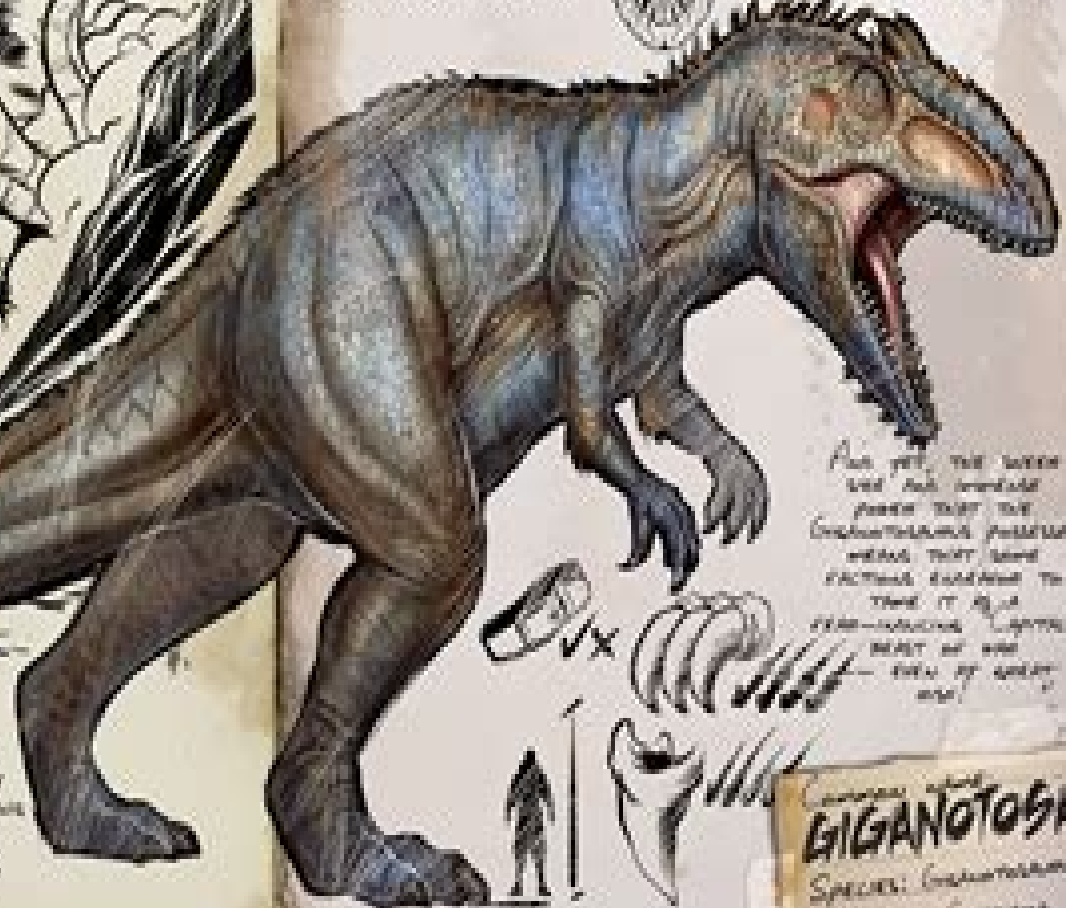

Fighting a Gigantotyrannus directly is never a good idea, as it's much faster than you are. Even if you manage to land a few hits, it will quickly retaliate with a powerful bite. The only way to survive is to stay out of its reach, using its own speed against it. It's a deadly predator, and it's not one you want to face head-on.

As to this, the fact that it's the fastest predator of all is not a surprise, but you should be aware that a Gigantotyrannus is a very dangerous creature. It's not just its speed that makes it so deadly, but also its size and power. It's a true apex predator, and it's one that you should never underestimate.

Despite the fact that it's the fastest predator, it's not the only one. There are many other predators in the same mold, and they're all equally deadly. It's a world of danger, and it's one that you should never underestimate.

As for the fact that it's the fastest predator, it's not the only one. There are many other predators in the same mold, and they're all equally deadly. It's a world of danger, and it's one that you should never underestimate.
