Insight Turkey / Spring 2021 - Resurge Of Anti-Islam Activity Worldwide ,2021-06-01 Although most European countries deny the existence of anti Islam and anti Muslim sentiment the evidence on the ground demonstrates that racism and hate crimes against Muslims have become widespread and begun to normalize throughout Europe Every passing day racist xenophobic and anti Islam tendencies are further entrenched in European societies and institutions The main concern about the most recent wave of anti Islam is the fact that the mainstream political parties have begun to accept anti Islam as a normal position and to use political discourses of ultranationalist and xenophobic political actors Many Western governments have begun to introduce new laws normalizing anti Islam outlooks in their countries When hostility becomes commonplace and discrimination is internalized all political codes are written accordingly laws are interpreted similarly and social perceptions are shaped in the same mould The process has come to such a point that victimized Muslims are even afraid of complaining about the attacks committed against them According to a survey published by the EU Agency for Fundamental Rights only 12 percent of Muslims report anti Muslim discrimination cases to officials That is the available data and numbers which are already alarming are only the tip of the iceberg Based upon the above explanations it can be claimed that the anti Islam trend is largely a Western product and that the Western political actors are largely responsible for the resurge of anti Islam activity in the world To put a stop to this situation European countries and EU institutions such as the European Parliament need to recognize anti Islam attitudes as a form of racism European actors should fight against all kinds of discrimination racism hate crimes and human rights violations as they fight against anti-Semitism The EU should initiate a de-radicalization program in order to re-establish a multicultural Europe Europe should not surrender to far right or far left terrorists otherwise it will continue to lose its moral superiority Moreover unless Europeans take necessary measures against anti Islam European states are destined to lose rationality in their policies This wicked process is similar to a double edged sword that cuts Muslims and non Muslim Europeans as well Lastly in this issue I would like to draw attention to the concept of anti Islam which I believe is a better concept to use instead of Islamophobia considering that anti Islam is a more political concept compared with the latter The Western and non Western perception of Islam is totally political Countries that have large Muslim minorities consider the spread of Islam and the increase of Muslims as a threat to their political projects and their way of life Anti Islam similar to any political perspective that targets all members of a religion or ethnicity is a form of racism With these said the current issue of Insight Turkey brings to its readers four commentaries and six research articles covering anti Islam practices worldwide while focusing on different dimensions of these activities As Muslim communities have been racialized as the Other for decades James Carr provides a comprehensive analysis on how contemporary neoliberal civilizing missions operate at different levels to create neoliberal citizens while penalizing Muslims that refuse to participate In Europe particularly Marcelo Macedo Rizo asserts that the depiction of Islam and Muslims has also been dominated by an

Othering He proposes the application of a democratic Alterity to overcome the existing harmful European vision towards Muslims The impact of far right parties activities and the governmental politics of fear in general have resulted in different realities that allowed anti Muslim hatred and actions to increase Within this perspective Farid Hafez explains how the introduction of the notion of political Islam by the Austrian People s Party came to the criminalization of vocal and or organized Muslims Meanwhile in Italy there is a lack of acknowledgment of Islam and Muslims by the Italian state Domenico Altomonte argues that anti Muslim hatred in Italy allows its citizens to conceive an exclusionary populist discourse and a shared negative view that impedes the enforcement of the right to religious freedom Furthermore Chris Allen analyzes the existence of anti Islam activities in the United Kingdom From a feminist perspective M erref Yard m and Ali H seyino lu analyze anti veil and anti burqa laws in France by focusing on their historical and social foundations However anti Islam is not only limited to Europe As CJ Werleman asserts the rising violence against Muslims in India has brought Muslims to the brink of genocide in India and Kashmir As mentioned previously anti Islam is mainly politically constructed This can be understood better when taking into consideration Kristin VandenBelt s research which compares the experience of Muslims in Europe and Latin America Denmark and Argentina respectively Media is another actor which augments anti Islam activities and discourse Within this perspective Ali Murat Yel s research article brings attention to Turkish media representation of Islam and its impact on the social antagonization Furthermore Sahar Khamis commentary focuses on the social media and concludes with a few thoughts on what needs to be done to ensure the success and continuation of efforts to counter Islamophobia Besides the pieces that cover the resurgence of anti Islam worldwide this issue also includes a number of articles that discuss some important issues Burhanettin Duran on the tenth anniversary of the Arab Uprising provides a general framework of the developments in the region Elmar Mustafayev looks at the stance of France on the Second Karabakh war between Armenia and Azerbaijan from the angle of the norms and values of the EU Migration has been the subject of the political developments in Europe lately Within this context brahim rdem and Yavor Raychev examine the use of coercive engineered migration as a hybrid threat during the 2015 EU refugee crisis Lastly Burak K rk in his article questions the state sponsoring of the terrorist operations of the Armenian Secret Army for the Liberation of Armenia and the Justice Commandos of the Armenian Genocide At a time when anti Islam activities are resurging and the Muslim voices are kept down this issue of Insight Turkey aims to present and to provide the verity to its readers through an extensive and rich framing of the ongoing anti Islam practices worldwide We hope that this issue contributes to increase awareness about anti Islam activities in today s world

Feeling Together and Caring with One Another Héctor Andrés Sánchez Guerrero, 2016-07-07 This book examines the human ability to participate in moments of joint feeling It presents an answer to the question concerning the nature of our faculty to share in what might be called episodes of collective affective intentionality The proposal develops the claim that our capacity to participate in such episodes is grounded in an ability central to our human condition our capacity to care with one another about certain things The author provides a phenomenologically adequate account of collective affective intentionality that takes seriously the idea that feelings are at the core of our emotional relation to the world He details a form of group emotional orientation that relies on the fact that the participating individuals have come to share a number of concerns Readers will learn that at the heart of a collective affective intentional episode one does not merely find a set of shared concerns but also a particular mode of caring In the end the argument presented in this monograph makes plausible the idea that the emotions through which humans participate in moments of affective intentional community express our nature In addition it shows that the debate on collective affective intentionality also permits us to better understand the relationship between two conflicting philosophical pictures of ourselves the idea that we are essentially social beings and the claim that we are creatures for whom our personal existence is an issue Thus aiming at an elucidation of the nature of our ability to feel together the book offers a detailed account of what it is to situationally express our human nature by caring about something in a properly joint manner

Economic Development and Political Action in the Arab World M.A. Mohamed Salih, 2014-03-05 Analysis of North African revolt against authoritarianism known as the Arab Spring embraced reductionist explanations such as the social media youth unemployment and citizens agitations to regain dignity in societies humiliated by oppressive regimes This book illustrates that reductionist approaches can only elucidate some symptoms of a social problem while leaving unexplained the economic and political structures which contributed to it One outcome of quiescence resource based ethnic and sectarian conflicts and faulty development paradigm is deepened inequality and a wedge between winners and losers or affluence wealth and power vis vis poverty and hunger among humiliated jobless and hope less masses The book blends theories of development and transition to explain the complex factors which contributed to North Africans revolt against authoritarianism and its long term consequences for political development in the Arab World This timely book is of great interest to researchers and students in Development Studies Economics and Middle Eastern

Movements for Human Rights David L. Brunsma,Keri Iyall Smith,Brian Gran,2016-09-07 How do people work together to advance human rights Do people form groups to prevent human rights from being enforced Why In what ways do circumstances matter to the work of individuals collectively working to shape human rights practices Human society is made of individuals within contexts tectonic plates not of the earth s crust but of groups and individuals who scrape and shift as we bump along competing for scarce resources and getting along These movements large and small are the products of actions individuals take in communities within families and legal structures These individuals are able to live longer yet continue to remain vulnerable to dangers arising from the environment substances struggles for power and a failure to understand that in most ways we are the same as our neighbors Yet it is because we live together in layers of diverse communities that we want our ability to speak to be unhindered by others use spirituality to help us understand ourselves and others possess a space and objects that are ours alone and join with groups that share our values and interests including circumstances where we do not know who our fellow neighbor is For this reason sociologists have identified the importance of movements and change in human societies When we collaborate in groups individuals can change the contours of their daily lives Within this book you will find the building blocks for human rights in our communities To understand why sometimes we enjoy human rights and other times we experience vulnerability and risk sociologists seek to understand the individual within her context Bringing together prominent sociologists to grapple with these questions *Movements for Human Rights Locally and Globally* offers insights into the ways that people move for and against human rights
