Reframing Disability and Quality of Life Narelle Warren, Lenore Manderson, 2013-03-12 This volume brings together two parallel fields of interest. One is the understanding among psychologists and other social scientists of the limits to psychometric measurement and the challenges in generating information about quality of life and wellbeing that enable comparison across time and place at both individual and population levels. The second is the interest among anthropologists and others in the lived experience of chronic illness and disability including the unpredictable fluctuations in perceived health and capability. Chronic conditions and physical impairments are assumed to impact negatively on people's quality of life affecting them psychologically, socially and economically. While some of these conditions have declined in prevalence as a result of prenatal diagnosis, early successful interventions and changes in medical technology and surgery, many of these conditions are on the increase as a consequence of improved life-saving medication and technology and greater longevity. Quality of life is often used as an indicator for successful and high quality health services and good access to medical attention and surgery for hip replacements or laser surgery to improve vision for instance. But it is also used as an argument against interventions when such interventions are seen to prolong life for its own sake. Yet we also know that people vary their idea of quality as a result of the context of fluctuations in their own health status, the presence or absence of pain or discomfort and as a result of variations in social and economic contextual factors. In exploring these questions, this volume contributes to emerging debates related to individual health outcomes but also to the social and other individual determinants that influence everyday life. Understanding these broader contextual factors will contribute to our knowledge of the kinds of services, support systems and infrastructure that provide people with good quality of life and a sense of wellbeing regardless of their physical health capability and functioning. The volume includes scholars from all continents who have been encouraged to think critically and to engage with the descriptive, methodological, social policy and clinical implications of their work.

Dyadic Coping: A Collection of Recent Studies Guy Bodenmann, Mariana K. Falconier, Ashley K. Randall, 2019-09-25 Dyadic coping is a concept that has reached increased attention in psychological science within the last 20 years Dyadic coping conceptualizes the way couples cope with stress together in sharing appraisals of demands planning together how to deal with the stressors and engage in supportive or joint dyadic coping Among the different theories of dyadic coping the Systemic Transactional Model STM

Bodenmann 1995 1997 2005 has been applied to many studies on couples coping with stress While a recent meta analysis shows that dyadic coping is a robust and consistent predictor of relationship satisfaction and couple s functioning in community samples some studies also reveal the significance of dyadic coping in dealing with psychological disorders e g depression anxiety or severe illness e g cancer diabetes COPD etc Researchers all over the world build their research on this or other concepts of dyadic coping and many typically use the Dyadic Coping Inventory DCI for assessing dyadic coping So far research on dyadic coping has been systematically presented in two books one written by Revenson Kayser Bodenmann in 2005 focussing on emerging perspectives on couples coping the other by Falconier Randall Bodenmann more recently in 2016 addressing intercultural aspects of dyadic coping in African American Asian and European couples This eBook gives an insight into recent dyadic coping research in different areas and countries *Effects of Interpersonal Relationships on Shared Reminiscence* Candice E. Condon, 2017-08-21 You rely on your memories for who you are as a person where you have been and what you have experienced in your life to date But what if it turned out that these memories that you hold closely aren t your memories at all What if they were someone else s memories This book documents the results of a research project investigating the effects of interpersonal relationship factors on shared reminiscence Although memory and the factors that influence it have been researched more in recent years there has been limited research which has measured the specific interpersonal effects of familiarity trust confidence and memory esteem on memory distortion There are four empirical chapters in this book Within these four chapters are four separate but related studies which examine the effects of interpersonal factors on memory distortion for ordinary events and for flashbulb memory of the terrorist attacks of September 11th 2001
