Corporate Strategy in the Age of Responsibility Mr Peter McManners, 2014-09-28 As the era of ever expanding markets and ample resources ends governments and business will have to behave differently The world is facing weak economic growth limits to affordable resources and increasing concerns about environmental consequences During the boom times governments championed deregulation and business responded by adopting an anything goes attitude In these straitened times strategic analysis has to engage with the challenges that society faces to create resilient corporations fit for the 21st century In Corporate Strategy in the Age of Responsibility Peter McManners who has for nine years run strategy workshops on the Henley MBA focusing on the global business environment sets about providing a strategic framework for navigating the new economic environment Chief

Sustainability Officers CSOs now exist but they struggle to find the strategic rationale for the improvements they champion. The author argues that their good intentions often lack traction partly because others in management don't get it but also because they are not ambitious enough. The book is not about preaching semi-charitable behaviour or how to enhance the reputation of the corporation; instead, it is about surviving and thriving in a challenging and changing environment. A corporate audience familiar with strategy books will relate to this book but will find it steers them towards radically new strategic thinking suitable for a turbulent period of transition.

Business Information Systems Graham Curtis, David Cobham, 2008. This text focuses on the information needs and management perspectives required in a business environment exploring the nature of information and its use in managerial decision-making processes.

The New Natural Resource Professor Hans Christian Garmann Johnsen, 2014-06-28. Increasingly in the public discourse there are references to the knowledge economy, knowledge society, knowledge workers, and knowledge organisations. The argument is that knowledge is becoming the main economic resource, replacing the natural resources that drove the industrial revolution. The new knowledge economy is driven by knowledge development, innovation, and highly skilled employees. Increasing investment in higher education and in universities is in line with this strategy and understanding. In an earlier book, *Creating Collaborative Advantage*, edited with Richard Ennals, Professor Hans Christian Garmann Johnsen argued that it is knowledge that links social and economic processes. He believes that what is missing in the current discussion on innovation is a conceptualisation of exactly what knowledge is. In *The New Natural Resource*, he digs deeper into what it is and how it develops and subsequently leads to widespread change. The author argues that knowledge is inherently a social phenomenon. That is why social processes are closely linked to economic development and why this relationship becomes even more apparent in the new knowledge economy. Knowledge is not an objective entity established once and for all. Knowledge development is interrelated with values, norms, perceptions, and interpretations. We need to know what the mechanisms are by which knowledge becomes legitimate, true, and relevant.

Repair Markus Berger, Kate Irvin, 2022-09-30. A collection of timely new scholarship. *Repair: Sustainable Design Futures* investigates repair as a contemporary expression of empowerment, agency, and resistance to our unmaking of the world and the environment. Repair is an act, metaphor, and foundation for opening up a dialogue about design's role in proposing radically different social, environmental, and economic futures. Thematically expansive and richly illustrated with over 125 visuals, this volume features an international interdisciplinary group of contributors from across the design spectrum whose voices and artwork speak to how we might address our broken social and physical worlds. Organized around reparative thinking and practices, the book includes 30 long and short chapters, photo essays, and interviews that focus on multiple responses to fractured systems, relationships, cities, architecture, objects, and more. *Repair* will encourage students, academics, researchers, and practitioners in art, design, and architecture practice and theory, cultural studies, environment, and sustainability to discuss, engage, and rethink the act of repair and its impact on
