*Evidenzbasierte Jurisprudenz* Hanjo Hamann, 2014-10-28 English summary How do jurists obtain knowledge over the living environment which they regulate Experience is an important source of knowledge but the complex connected information of society also increasingly requires an empirical study of law and yet the methods of empirical investigation are not so easy to manage and their results are not as easy to interpret as one might wish For this reason Hanjo

Hamann discusses the principles of quantitative empirical study and connects the critical reflection of empirical cognitive possibilities with specific epistemological interests of jurisprudence. What emerges from this method is a pragmatic theory of reception which according to the example of evidence based medicine places particular value on so called meta studies. The author tests its practical uses for the basic empirical assumptions of the collegial principles of company law which arises from its dogmatic and legally comparative analysis. For his dissertation Hanjo Hamann was awarded the Dissertation Prize of the Esche Schumann Commichau Foundation, the Telekom Prize for Civil Law of the University of Bonn as well as the Otto Hahn Medal of the Max Planck Society. German description: Wie gewinnen Juristen ihr Wissen über die Lebenswelt die sie regeln? Erfahrung ist eine wichtige Erkenntnisquelle, aber die komplex vernetzte Wissensgesellschaft erfordert zunehmend auch empirische Rechtsforschung. Dabei sind die Methoden empirischer Forschung gar nicht so leicht zu handhaben und ihre Ergebnisse nicht so einfach zu interpretieren wie man annehmen möchte. Hanjo Hamann erörtert deshalb die Grundlagen quantitativ empirischen Forschens und verbindet die kritische Reflexion empirischer Erkenntnismöglichkeiten mit spezifisch juristischen Erkenntnisinteressen. Daraus entsteht eine pragmatische Rezeptionslehre, die nach dem Vorbild der evidenzbasierten Medizin besonderen Wert auf sogenannten Metastudien legt. Deren praktischen Nutzen erprobt der Autor vor allem an den empirischen Grundannahmen des gesellschaftsrechtlichen Kollegialprinzips, die sich aus dessen dogmatischer und rechtsvergleichender Analyse ergeben. Hanjo Hamann erhielt für seine Dissertation den Dissertationspreis der Esche Schumann Commichau Stiftung, den Telekom Preis für Zivilrecht der Universität Bonn sowie die Otto Hahn Medaille der Max Planck Gesellschaft.

Pharmaceutical companies academic researchers and government agencies such as the Food and Drug Administration and the National Institutes of Health all possess large quantities of clinical research data If these data were shared more widely within and across sectors the resulting research advances derived from data pooling and analysis could improve public health enhance patient safety and spur drug development Data sharing can also increase public trust in clinical trials and conclusions derived from them by lending transparency to the clinical research process Much of this information however is never shared Retention of clinical research data by investigators and within organizations may represent lost opportunities in biomedical research Despite the potential benefits that could be accrued from pooling and analysis of shared data barriers to data sharing faced by researchers in industry include concerns about data mining erroneous secondary analyses of data and unwarranted litigation as well as a desire to protect confidential commercial information Academic partners face significant cultural barriers to sharing data and participating in longer term collaborative efforts that stem from a desire to protect intellectual autonomy and a career advancement system built on priority of publication and citation requirements Some barriers like the need to protect patient privacy present challenges for both sectors Looking ahead there are also a number of technical challenges to be faced in analyzing potentially large and heterogeneous datasets This public workshop focused on strategies to facilitate sharing of clinical research data in order to advance scientific knowledge and public health While the workshop focused on sharing of data from preplanned interventional studies of human subjects models and projects involving sharing of other clinical data types were considered to the extent that they provided lessons learned and best practices The workshop objectives were to examine the benefits of sharing of clinical research data from all sectors and among these sectors including for example benefits to the research and development enterprise and benefits to the analysis of safety and efficacy Sharing Clinical Research Data Workshop Summary identifies barriers and challenges to sharing clinical research data explores strategies to address these barriers and challenges including identifying priority actions and
